For 60 years, we’ve been working to change the world, and we’re not about to stop. At Monash, we see challenges as opportunities to make things better.

It’s hard to imagine a time when the need to make positive change has been greater than now.

We want you to help us do it.

Whether you want to change your life, your career, your community or the world, your journey starts at Monash.

As a university with a global footprint, we know we have to play our part in solving the problems facing the world.

That’s why all Monash students, lecturers, researchers, professional staff, alumni and supporters contribute to making real change.

You, too, have the opportunity to step up and make a difference.

Are you ready?

IF YOU DON’T LIKE IT, CHANGE IT.

Ready to make a change? Click here to learn more.
A GLOBAL COMMUNITY

ITALY
Prato
In the heart of Tuscany and close to Florence, Prato is our European base where eight of our faculties offer units covering design, law, business and more.

MALAYSIA
Kuala Lumpur
Close to fast-paced Kuala Lumpur, Monash University Malaysia is our third-largest campus, with more than 8000 students undertaking courses offered across seven schools.

INDONESIA
Jakarta
Monash University will be establishing the first foreign university campus in Indonesia. Based in Jakarta, Monash Indonesia will be offering master’s and PhD degrees, as well as executive programs and micro-credentials. The course offerings will be research intensive with a focus on industry engagement.

INDIA
Mumbai
Bustling Mumbai is home to the IITB-Monash Research Academy, a collaboration that gives PhD students opportunities to work closely with industry to find solutions to global problems.

CHINA
Suzhou
The Southeast University-Monash University Joint Graduate School, in the heart of one of China’s biggest innovation precincts, offers master’s and PhD study options in areas ranging from industrial design and IT to business.

MELBOURNE AUSTRALIA
Clayton
Clayton, in Melbourne’s rapidly growing southeast corridor, is our biggest campus, home to 38,000 students and eight of our 10 faculties. Everything you need is on campus – food outlets, sporting facilities, health services and more.

Peninsula
Home to approximately 4000 students, our Peninsula campus offers courses from the Faculty of Education along with select courses from Monash Business School. Partnering with leading players in primary and allied healthcare, we also offer a number of courses from the Faculty of Medicine, Nursing and Health Sciences.
GET AHEAD WITH MONASH

From day one, a Monash education sets you on the path to future career success.

Our programs and platforms offer work-integrated learning experiences and engagement with industry. You’ll develop an enterprising mindset, hone your employability skills and gain a competitive edge in the graduate employment market.

Career Connect
Our Career Connect program gives you access to experienced coaches and industry-based professionals. Take part in employability workshops, small-group career conversations and, in your final year, one-on-one coaching.
monash.edu/career-connect

Student Futures
Our Student Futures platform allows you to collate the real-life skills that will show employers you have what they’re looking for, taking into account not just your university activities, but those that are part of your ‘outside’ life – paid work, family responsibilities and contributing to your community.
monash.edu/student-futures

Develop leadership
While studying, you’ll be encouraged to foster the skills for effective leadership that will enable you to positively influence the University, your community and, eventually, the world.
monash.edu/students/leadership

Monash Talent
With our employment service, Monash Talent, you can start your career search without stepping foot off campus. We have a team of recruitment specialists who’ll connect you with reputable employers and match you with jobs that suit your skills and passions.
monash.edu/talent

Mentoring
Throughout your studies here, you have the opportunity to mentor or be mentored. You can share or gain insights about life at university, career planning, building employability, as well as future goals.
monash.edu/mentoring

Work-integrated learning
Incorporate professional experience into your studies, through clinical placements, fieldwork, study tours, placements, or internships.
monash.edu/students/future-work/experience/wil

Click here to find out how a Monash education prepares you for success into the future.
LIFE-CHANGING RESEARCH

Monash research is making a positive impact in local communities and around the world.

There’s also Monash’s Faculty of Pharmacy and Pharmaceutical Sciences, where the anti-influenza drug Relenza was designed and synthesised. This drug is now used globally.

Today, our ambition and optimism are stronger than ever. We have a clear vision of what we want our research to achieve and how we’ll help our researchers make it happen.

Even before we became the global university we are today, our researchers looked beyond traditional boundaries, discovering new ways of approaching the fields in which they worked. It’s why a Monash education is so respected around the world. Things that we now take for granted wouldn’t exist without the initial work of Monash researchers, such as the work of professors Alan Trounson and Carl Wood, who achieved the world’s first IVF pregnancy. The Trounson and Wood team went on to accomplish Australia’s first (and the world’s fourth successful) IVF birth in 1980.

NOBEL PEACE PRIZE FOR CLIMATE CHANGE

Eight Monash University scientists shared in the prestige of the 2007 Nobel Peace Prize award for their work on climate change. They were awarded the prize for their discovery of the role of various chlorofluorocarbons in the formation of the ozone layer.

HELPING THE BLIND TO SEE

The Monash Vision Group draws on the capability of Monash University and other partners to develop bionic eye technology to connect with the visual cortex. Patients with damaged optic nerves or physical trauma to their eyes may one day be able to see again.

BUILDING STRONGER, LIGHTER PLANES WITH 3D PRINTING

Professor Xinhua Wu and her team at the Monash Centre for Additive Manufacturing (MCAM) have created an aluminium alloy that will make aircraft 30 to 40 per cent lighter, twice as fuel-efficient and still structurally sound.

TACKLING GLOBAL ENERGY CHALLENGES

In an innovation that could save thousands of women’s lives following post-partum haemorrhage in low-resourced countries, Professor Michelle McIntosh has developed a new, inhaled formulation of the drug oxytocin that can be stored at room temperature.

GLOBAL SLUM REVITALISATION

Monash was awarded a $14 million grant for the Revitalising Informal Settlements and their Environment (RISE) project. This will significantly advance human health by delivering the first public health and environmental data on the practice of an alternative water management approach, forming the basis for policies and strategies of urban informal settlements worldwide.

PIONEERING DIABETES DEPARTMENT AT THE ALFRED

We’re the only university with a dedicated department to research into diabetes. Led by Professor Mark Cooper AO, a senior endocrinologist at The Alfred Hospital, Monash’s Department of Diabetes uncovers strategies to combat diabetes and its complications, including kidney and heart disease, and blindness.

WORLD MOSQUITO PROGRAM

Monash University is the World Mosquito Program’s research hub of Oceania, and is committed to improving health conditions and strengthening the capacity of local communities around the world to reduce the threat of mosquito-borne diseases such as Zika, dengue, chikungunya and yellow fever.

HELPING WOMEN GIVE BIRTH SAFELY

An innovation that could save thousands of women’s lives following post-partum haemorrhage in low-resourced countries, Professor Michelle McIntosh has developed a new, inhaled formulation of the drug oxytocin that can be stored at room temperature.

VICTORIAN HEART HOSPITAL

Operated by Monash Health and located within the Monash University campus, the hospital will host world-leading research programs in cardiovascular health, boosting Victoria’s medical industry and economy.

DID YOU KNOW?

In 2019, we had 5033 graduate research students studying at Monash University, and our researchers attracted a total research income of $413.8 million.
At Monash, we believe in unlocking your potential to make a difference in the world.

Monash University is committed to attracting academic high achievers and producing internationally competitive graduates.

**MONASH SCHOLARSHIPS**

**Monash International Leadership Scholarship**
Tuition fees are paid for the duration of the course for high-achieving international coursework students. Selection is based on academic achievements, application statement and the student’s potential to be a Monash University ambassador.
[monash.edu/new-scholarships](http://monash.edu/new-scholarships)

**Monash International Merit Scholarship**
A$10,000 is paid per year for the course duration to high-achieving international coursework students. Selection is based on academic achievements, application statement and the student’s potential to be a Monash University ambassador.

**Monash International Tuition Scholarship**
This scholarship covers your course fees as an international graduate research student. Selection is based on academic achievements and eligibility.

**Monash Graduate Scholarship**
A$28,373* is paid per year for the duration of your research. Selection is based on academic achievements and eligibility.
[monash.edu/graduate-research/future-students/scholarships](http://monash.edu/graduate-research/future-students/scholarships)

**Coursework scholarship applications**
Once you’ve received a full offer from Monash, you’re able to apply for a scholarship. Students from all countries are invited to apply for scholarships.

**Graduate research scholarship applications**
You can apply to be considered for all scholarships you’re eligible for, together with your application for admission. [monash.edu/graduate-research/future-students/apply](http://monash.edu/graduate-research/future-students/apply)

**EXTERNAL SCHOLARSHIPS**

**Australia Awards**
Australia Awards are prestigious international scholarships funded by the Australian government, and aim to contribute to the long-term development needs of Australia’s partner countries. Monash offers a range of courses for the next generation of global leaders. To find out more, see the Australia Awards Scholarships information on the Department of Foreign Affairs and Trade website: [www.dfat.gov.au](http://www.dfat.gov.au)

**Other external scholarships**
Monash has relationships with sponsors from numerous countries worldwide. These scholarships and sponsorships offer a range of benefits to recipients to enable them to study at Monash University.
[monash.edu/scholarships](http://monash.edu/scholarships)

*2020 rate

We want as many bright minds as possible to benefit from a Monash education. [Click here](http://monash.edu/) to learn about our scholarships program.
If you’re passionate about tackling global challenges and collaborating with some of the brightest minds in your discipline area, then Monash is the place where your ideas and actions can gain momentum.

Our graduate degrees will give you the edge in the employment market and prepare you for the professions of the future, both in Australia and overseas.

Our industry-relevant courses are embedded with the leadership, entrepreneurial and commercialisation skills that will advance your career. You can take a semester at the King’s College London, undertake master’s units at the Monash Centre in Prato, Italy, or complete a double master’s program with one of our international partners.

Globally connected, our alumni network is at the forefront of social and technological progress at many of the world’s best companies. If you aspire to make a positive impact in the world, you’ll find Monash learning is all about discovery, creativity, challenge and opportunity.

Get ready to see the world

International placements
Choose from a range of international placements – Asia, Africa, Europe, US.

Overseas internships
Intern at the United Nations, New York, or Shandong Television in China – just two of many options.

Monash Malaysia
Our Monash Malaysia campus offers students the opportunity to spend a semester at Monash University’s third-largest campus, which offers a distinctly international and culturally rich environment.

Monash Prato, Italy
Study at the Monash Prato Centre in Italy – offerings include fine art, architecture, Italian and law.

Connect
Connect with 400,000-plus alumni across the globe.

DID YOU KNOW?
With 83,000-plus students and 400,000-plus alumni from approximately 160 countries, Monash is Australia’s largest university.
Our Australian base is a vibrant, multicultural city that offers an abundance of cultural festivities, international sporting events, cafes and restaurants with cuisines from around the world, beautiful parks and beaches, and an eclectic mix of music and arts. You couldn’t pick a better place to live.

As one of the world’s most liveable cities, you can expect excellence in public transport and healthcare, as well as opportunities for casual work while studying. Plus, Melbourne is renowned as a welcoming environment for international students, providing a home away from home.

1 Economist Intelligence Unit 2011-2018.
LIVING ON CAMPUS

Start with a short stroll to class before lunch. Study on the lawns in the afternoon. Gyms, sports fields and even restaurants – they’re all on your doorstep if you live on campus.

Click here for an interactive tour of our Clayton campus.

ON-CAMPUS ACCOMMODATION

Our on-campus accommodation is supported by live-in staff and student leaders, making campus life a breeze. There’s also 24-hour security on campus, and a thriving events and activities program to help you settle into your new community.

Prices for on-campus accommodation range from $240 to $303 per week. We also have dedicated graduate wings in our urban community halls exclusively for graduate students. They’re quieter and often include shared spaces to study and to connect with your neighbours.

If you’re a graduate or mature-aged student you’ll be allocated a room within a graduate wing. Applications are free and open in September. You can choose from traditional halls of residence, self-contained studio apartments or shared apartments.

With students from 70 countries and the wide range of facilities on your doorstep, discover why on-campus accommodation is much more than just your room.

monash.edu/accommodation

COST OF LIVING

Before you begin your studies at Monash, it’s a good idea to plan and prepare a budget.

Below are some costs associated with living and studying in Australia, and should be used as an approximate guide. These figures (in Australian dollars) are estimates only, and may vary depending on your location and lifestyle. Rent, for example, is more expensive in some areas of Melbourne than others. You may also need spending money for things like medication and other personal items, such as clothes.

All costs are subject to inflation.

Depending on your chosen course, additional costs may apply for class materials and other requirements. Please make sure you check any additional costs for your course before commencing your studies.

Off-campus accommodation
• Hostels and guesthouses $90 to $150 per week
• Rooming houses $85 to $215 per week
• Private rental $165 to $440 per week
• Boarding schools $11,000 to $22,000 per year

Other living expenses
• Groceries and eating out $80 to $280 per week
• Gas and electricity $35 to $140 per week
• Phone and internet $20 to $55 per week
• Public transport $15 to $55 per week
• Car (after purchase) $150 to $260 per week
• Entertainment $80 to $150 per week

* Prices shown here are based on a typical three-bedroom house.
University study takes commitment and drive, especially if you’re moving to a new city or country.

We can help you settle into university life by providing an extensive range of support programs and services. And to help you maintain the momentum, we’ll put you in touch with like-minded people – to share information, build networks and get the support to keep you going. We recognize the richness and depth of our Monash community, and are committed to diversity and inclusion.

monash.edu/study/student-life

Monash Connect

Monash Connect student service centres are located on each Australian campus, making it easy for you to understand administrative processes and access information. Staff can assist with your questions about admissions, enrolment, fees, student visas, accommodation, language support, academic support, graduations, scholarships and finding your way around campus. We now offer “live chat” to new and existing students. It’s just another way we’re making it easier to find out what you need to study at Monash.

monash.edu/connect

Monash Postgraduate Association (MPA)

As a Monash graduate student, you’ll automatically become a member of the Monash Postgraduate Association, which provides services for graduate students including social functions, newsletters and publications, advice, advocacy and mediation, and seminars to help you transition from study to a successful career.

mpa.monash.edu

Campus security

While Melbourne is considered one of the world’s most liveable cities1, at Monash we still look out for our students’ wellbeing. We provide a range of security services to ensure our students are safe at all times. These include 24-hour security patrols, security escorts and an evening security bus between our Clayton and Caulfield campuses.

monash.edu/safety-security

Wellbeing

Monash offers expert health and wellbeing counsellors, medical practitioners and multi-faith chaplains to support you in all facets of your life. Information is provided at orientation on a wide range of topics, including settling into life in Australia, healthcare, transport, student visas, safety, getting connected and opportunities to make friends. We also have an informative handbook specifically for new Muslim students studying in Victoria. You can download a copy of the Salaam Monash handbook in English, Bahasa Indonesia or Arabic from monash.edu/salaam-monash

It’ll provide information about adjusting to life in Australia and studying at Monash, including maps of campus, lists of social groups and a directory of halal outlets. Alternatively, you can pick up a copy of the handbook from Monash Connect on your campus.

monash.edu/health

Airport pick-up

Monash University welcomes all new international students with a free airport pick-up service to take you to your accommodation. To arrange a pick-up, you must submit an airport pick-up request form at least three working days before you arrive in Australia.

monash.edu/study/international/preparing/reception

Clubs and societies

More than 100 student-run clubs and societies organise activities, events, competitions, productions, get-togethers, seminars, camps, conferences and more for our 10,000-plus student members. There’s a wide variety of clubs on offer – academic, cultural, spiritual and special interest – to put you in touch with like-minded people. Our involvement in more than 50 sports means it’s easy to get involved – try our athletics, table tennis, dance, badminton, basketball or soccer clubs.

monash.edu/study/student-life/clubs-and-societies

Family support

If you have children or other family commitments, Monash provides advice regarding childcare, primary school, playgroups, school holiday care and other family and support matters. We have arrangements with childcare centres at our Clayton, Caulfield and Peninsula campuses. Social events for international students with families are also held throughout the year.

monash.edu/childcare

Disability support services

If you have a disability, medical or mental health condition that may impact your study, Disability Services can support you. Registered students can access services such as academic support, assistive software and equipment loans.

monash.edu/disability

English Connect

English Connect offers a range of free programs to help you become savvy in Australian culture, further develop your English language skills and engage with students from all over the world. Let’s Chat programs are fun, obligation-free group conversation sessions. Peer Support provides one-on-one support with written English. No assessment, no homework, no pressure – all you need is your enthusiasm to participate in practical sessions designed to refine your conversation skills in a supportive environment.

monash.edu/english-connect

Monash Professional Pathways

Offering a 12-week internship and work-readiness training, the Professional Year Program from Monash Professional Pathways helps you obtain the skills and experience employers are looking for.

1 Economist Intelligence Unit 2011-2018.
We know that when, where, how and what you study is critical to progressing your career, skills and knowledge. You might be a professional looking to gain expert knowledge in your current field, or you might be looking for a career change. Whatever your ambition, Monash can help you get there.

Professional entry master’s courses
These courses are specifically designed to prepare you to enter a regulated profession such as law, accounting or teaching. These courses can take two to four years to complete, depending on the discipline. Some of these areas can also be studied at an undergraduate level, however a professional-entry master’s course is ideal if you make the decision to enter a different field to that of your first course.

Expert master’s courses
These courses allow you to extend expertise gained through your undergraduate degree, or add breadth to your knowledge and skills within a new or complementary field. If you complete a four-year honours bachelor’s degree, you can usually complete an expert master’s degree in the same discipline in just one year, meaning you graduate with both a bachelor’s and a master’s degree in five years. See pages 20-21 for a full list of coursework courses.

Double master’s courses
A double degree course allows you to study for two degrees at the same time. You’ll graduate with two master’s degrees, giving you more career flexibility and opportunities. It allows you to keep your options open and develop expertise in different yet complementary areas.

Study modes
We know you have many priorities and commitments. That’s why we offer flexible study modes to allow you to build your study around your life. Most courses are offered in both full-time and part-time study modes. Some units are offered in intensive block mode (usually Thursday to Sunday), allowing you to arrange a short break from work to complete a unit, and some are offered outside business hours. It’s whatever works best for you.

Off-campus (distance learning)
You don’t have to be at Monash to study with Monash. Through our online distance learning, you can study with Australia’s biggest university without ever having to set foot on campus. It’s the perfect option if you need to balance university with work, family and other personal commitments. You’ll study the same units and gain the same qualification as you would if you were on campus. It includes a combination of print study material and electronic communication. monash.edu/off-campus-learning

GAIN CREDIT FOR PRIOR LEARNING
Many of our master’s programs offer you block credit on the basis of your education background.

**COURSE INFORMATION FAST FACTS**

Look for these icons on each course page for key information.

- Location
- Duration
- Intakes
- $ - Fees
Our Master of Architecture course develops graduates with a vision to design architecture that responds to the dynamic needs of society.

Course structure
An integrated program of study allows you to select from a range of design studios in conjunction with advanced architectural studies. Complementary units introduce the methods and tactics of architectural design research and engage with the multidisciplinary socio-cultural, political, economic, historical, theoretical and technical dimensions relevant to contemporary architecture and urbanism.

Learn through project-based design studios
Central to Monash’s architecture program is our project-based design studios, which address a wide range of architectural issues and challenges, including housing, urban design, digital practice, evolving construction methods and design speculation.

All studios are taught by Monash academics alongside leading architectural practitioners, ensuring that you’re exposed to current industry practice. Each semester, you can select your chosen studio from the many on offer, allowing you to follow your interests and passions.

Accreditation
The Master of Architecture encompasses the knowledge and skills required for professional recognition by the Architects Accreditation Council of Australia (AACA) and the Australian Institute of Architects. To register as an architect, graduates must also complete two years of professional practice and pass the AACA Architectural Practice Examination. For more details, visit the Architectural Registration Board of Victoria website at www.arbv.vic.gov.au

Entry requirements
Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification/s that must be accredited to the equivalent Australian level specified in the table below.

Monash English language level
Level A (see page 112).

Now open to graduates of any recognised bachelor’s degree
Our Master of Architecture offers a new three-year entry option, open to graduates of any Australian bachelor’s degree (or equivalent).

So, if you’ve studied design, business, economics, environmental science, landscape architecture, engineering, mathematics, IT, geography, international development, physical science or fine art, then we’re interested in you. If you hold an Australian Bachelor of Architectural Design (or equivalent), you’re welcome to apply for the two-year master’s course.

Whether you’ve completed undergraduate studies in architecture or in another field, the Master of Architecture meets the academic requirements necessary to register as an architect.

1 In equivalent Monash University grading scale terms, a 100% scale where 50% is a pass.
2 Even if you’re eligible for a shorter course duration, you may elect to complete the longer duration.
3 You must provide a compilation of evidence of creative work, a curriculum vitae and a statement of intent. Shortlisted applicants may be invited for an interview.
4 The qualifying undergraduate degree must have been completed within five years of the proposed commencement of the Master of Architecture.
5 If you’ve successfully completed the Bachelor of Architectural Design at Monash, you’ll automatically progress to the Master of Architecture.
6 You must provide a design folio and a curriculum vitae. Shortlisted applicants may be invited for an interview.

I fell in love with Australia and chose Monash for its reputation and recommendation by my high school mentor. Throughout my studies I had the opportunity to work on a range of diverse projects that align to my interests and dealt with real-life issues. The connections I made and the experience was invaluable. It allowed me to graduate with a job at a landscape architecture firm.”

JEAN-CHRISTOPHE OLIVIER PETITE
Bachelor of Architectural Design and Master of Architecture (2018)
In a rapidly transforming profession, designers need to constantly develop innovative skills and knowledge to respond and be a leader in their field. Positioned at the intersection of several creative disciplines, our Master of Design provides you with the platform to explore advanced principles in contemporary design that will enhance your design skills. This project-based and studio-focused course offers the opportunity to extend your learning within a specialised area of interaction design, multimedia design or collaborative design. Alternatively, you can choose from a range of units from across these three areas to construct a specialisation in advanced studies in design. This program is ideal for those with an undergraduate degree in any discipline who are keen to enter the expanding fields of professional design engagement, or for design practitioners aiming to upgrade their expertise.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

Level A (see page 112).

Specialisations

Our specialisations give you an understanding of the relationship between interactive activities, products and human behaviour.

Collaborative design

Collaborative design places you at the intersection of interior, graphic and industrial design practice. The program will set you design challenges involving image, text, products, narratives, systems, services, public and private space, materiality and virtuality. You will develop independent conceptual and practical design skills alongside an ability to be part of collaborative design processes. You will expand your awareness across design disciplines, develop multidisciplinary design expertise, and build broader skills in leadership, professional adaptability and complex project planning.

Interaction design

This specialisation develops your skills in the design of contemporary artefacts, products and services that engage with interactive, user-focused technologies and processes. These can include, but aren’t limited to, health and medical equipment, ‘smart’ furniture, educational toys, wearable technologies, information kiosks and transport systems. You will use a diverse range of interactive processes, including the application of advanced technologies, electronics and programming, physical and virtual interface manipulation, engineering and material fabrication, and rapid prototyping.

Multimedia design

Multimedia design develops your skills in digital communication environments. This includes designing for the web, motion and animation, and interactive touchscreen devices and surfaces. Emphasising an advanced knowledge of existing and emerging digital design processes and systems, this specialisation embraces projects of varied scale, from hand-held smart devices to large public interactive screens. It develops your ability to build a communication narrative, use multimedia processes to fill community and business needs, and understand the end-user’s engagement with projects or products such as websites, apps and other screen-based media.

Advanced studies in design

Construct an individual program of study from across interaction design, multimedia design and collaborative design. This enables you to tailor your unit choices while addressing the fundamental principles of advanced design practice and thinking. It will inspire you to connect research and practice across the design disciplines, and to become a thoughtful design practitioner. You’ll broaden your knowledge of key design constructs, deepen your professional learning in design areas of interest, and advance your capacity as a design professional.

URBAN PLANNING AND DESIGN

Professional entry master’s

Complex urban problems require planning professionals who are versatile and multifaceted. Employers now require planners who can bring fresh perspectives to solving urban problems, and readily adapt to new roles in the workplace. This course puts you ahead of the competition by training you to integrate design with traditional policy-based knowledge. Our Master of Urban Planning and Design prepares future professionals with the skills, knowledge and insight to create sustainable civic visions and strategies for our evolving built environments and communities.

Whether you’re keen to upskill or change careers, as a Monash Urban Planning and Design graduate you’ll be ready to work towards a sustainable and people-centred future.

How the course works

The course is centred on four project-based learning themes: compact city, ecological city, sprawling city and inclusive city. You’ll integrate design skills and thinking with planning knowledge in real-world learning environments, and engage in lectures, workshops, seminars and field visits. You can tailor your studies to individual interests with elective units on topics that include transport, sustainable development, economics, Indigenous perspectives or international development.

Where could it lead you?

There are many directions your career might take, and you can be employed in challenging positions in a range of organisations. You may work in:

• local government as a strategic or statutory planner working on local development proposals or resolving community disputes.
• state agencies that manage environmentally sensitive areas or providing transport and other infrastructure.
• Australian or international firms that specialise in community planning or delivering affordable housing.
• other graduates in not-for-profit organisations in underdeveloped or overdeveloped cities or regions.

Entry requirements

Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

ARTS, HUMANITIES AND SOCIAL SCIENCES
OUR COURSES

Create a Master’s Degree that suits you

Our courses offer a unique and nuanced approach to their industry and subject matter, and are underpinned by our guiding principles to be innovative, international, and engaged. There are many ways you can create the master’s degree that best suits your interests and career needs:

- Tailor your program by taking specified electives from any other coursework master’s degrees offered in the faculty
- Accelerate your studies and complete your degree in less than one year
- Apply for professional internships to develop your professional experience and networks
- Go on study tours and gain practical, on-the-ground experience both in Australia and abroad

Create a pathway to a PhD – by completing a research thesis as a prerequisite for future enrolment into a PhD or master’s by research

Take advantage of leadership opportunities through our Arts Graduate Leadership Program and gain access to professional development workshops.

• Graduate Diploma in Applied Linguistics
• Graduate Certificate of Arts

ALTERNATIVE EXITS

- Master of Applied Linguistics

BIOLINGUISTICS

Expert master’s

As globalisation continues, so does the demand for those with intercultural communication skills to reach wide audiences.

This course offers a competitive advantage to language teachers, interpreters, editors and others working with language in increasingly multilingual and multicultural societies. You’ll gain a critical understanding of theoretical and practical issues relating to applied linguistics, including second-language acquisition, language teaching, language contact and intercultural communication.

The application of linguistic knowledge to professional contexts is at the heart of the curriculum. You’ll have the opportunity to regularly engage with real-world case studies and practical problem-solving as part of your studies.

There’s also an extensive fortnightly seminar series allowing you to engage with guest lecturers from industry and other universities. High-achieving students also have the freedom to devise their own internship or research project that may be undertaken locally or internationally.

Entry requirements

 Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification that must be accredited to the equivalent Australian level specified in the table below.

BIOPHYSICS

Expert master’s

Bioethics responds to increasing community concern about ethical issues arising from scientific discoveries in the health and biological fields.

Taught through the Monash Bioethics Centre (one of the World Health Organization’s six collaborating centres worldwide), you’ll work with expert staff who are internationally recognised leaders and active, prominent contributors to public and professional discussions about a variety of issues in the field.

You’ll have the opportunity to collaborate with industry and participate in study tours and field schools, both in Australia and overseas. The Master of Bioethics is particularly well-suited to healthcare professionals and scientists who face complex ethical issues in their working lives. It also offers skills development for those formulating related public policy and law, as well as for anyone wanting to explore issues of public concern.

Taking a broad approach to key issues such as ethical theory, human research ethics, and questions of life and death, this course is suitable for those with little or no background in ethics or philosophy, and for philosophy graduates with an interest in further study of bioethics.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification that must be accredited to the equivalent Australian level specified in the table below.

DID YOU KNOW?

As a Monash Master of Bioethics student, you can apply for an annual fellowship to work as an intern in the Global Health Ethics Unit at the World Health Organization headquarters in Geneva, Switzerland.
COMMUNICATIONS AND MEDIA STUDIES

Expert master’s, graduate certificate

Be introduced to the latest developments and research in communications and media, with a view to real-world application.

You’ll expand your understanding of the key challenges posed by the emergence of digital media, globalisation and increasing levels of cross-cultural exchange. Skill development in critical thinking, writing and presentation in multicultural settings are designed to build learning success and enhance your career capabilities.

EXPERT MASTER’S

Our Master of Communications and Media Studies features guest professional speakers in conjunction with industry-focused field trips to media outlets in Sydney, Melbourne and Shanghai.

You’ll have the option of undertaking a communication industry internship where you can apply your skills in real-world situations. Excursions and guest lectures help to provide further industry-based learning opportunities.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration.

Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

GRADUATE CERTIFICATE

As a student in the Graduate Certificate of Communications and Media Studies, you’ll learn how to analyse, critique and challenge assumptions about the role of media.

The degree is suitable for emerging professionals in communications and media industries, as well as those wishing to expand their knowledge of this dynamic field.

Entry requirements

Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

Shanghai City Lab

Don’t miss this unique opportunity to explore one of Asia’s most exciting cultural metropolises. You’ll receive lectures from Monash staff alongside guest experts from local universities, and undertake fieldwork in the city alongside local students. You’ll also be introduced to a range of Chinese and international creative working in the local cultural sector who’ll give you an insight into the cultural success story behind one of China’s largest global cities.

I chose to study in Melbourne because it’s so cultural – it has a lot of live music, galleries and diversity. During my master’s I completed an internship with the Abbotsford Convent, a community arts centre in Melbourne. It was a great way to make connections with a lot of artists and cultural entrepreneurs, and it complemented my studies. It also gave me the confidence that I would be comfortable working in international contexts.”

CLOE KARAOGLU

Master of Creative and Cultural Industries (2019)

CULTURAL AND CREATIVE INDUSTRIES

Expert master’s

Gain an overview of the rapidly growing cultural and creative industry sector and its many employment opportunities.

Whether exploring creative clusters in Melbourne and Shanghai, or understanding the business models of global digital industries, our graduate content will prepare you for a career in this expanding sector.

You’ll gain insight into how to initiate and manage projects, and how to evaluate their success, while maintaining close contact with a range of industry professionals and real-world projects from Australia and overseas.

Our program involves practitioner and industry experts, field trips and concrete case studies, capped by the kind of analytical and empirical research required for contemporary employment in policy, arts, business and social enterprise.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration.

Master of Creative and Cultural Industries (2019)
INTERNATIONAL DEVELOPMENT PRACTICE

Expert master’s, graduate certificate

Tackle the complex political, economic, cultural and ecological challenges that lead to extreme poverty, poor health, fragile governance, inequality and environmental vulnerability.

Delivered by specialists from the humanities, social sciences, medicine, business, education and law, you’ll develop a critical understanding of the political, economic, cultural and environmental challenges contributing to human inequality. Learning directly from leading researchers and practitioners, you’ll combine this academic insight with a high level of industry integration.

DEGREE AWARDED
Master of International Development Practice

ALTERNATIVE EXITS
• Graduate Certificate of Arts
• Graduate Diploma of Arts

GRADUATE CERTIFICATE

The Master of International Development Practice offers a broad approach to sustainable development, via six streams: democracy, justice and governance; crisis, change and management; gender, peace and security; field studies for development; language and culture; sustainable resource management.

We aim to develop and mentor student leaders through our many sector partnerships and mentoring programs such as Cold M, which matches students with a development practitioner from around the world based on shared interests.

Entry requirements

INTERNATIONAL RELATIONS AND JOURNALISM

Expert double master’s

Keen to further your interests and aspirations? This double-degree course could be for you.

You’ll complete one of the specialisations offered within the Master of International Relations: a comprehensive introduction to the international political system and key issues in international relations. You’ll also take on the main components of the Master of Journalism, giving you the chance to enter the journalism industry or, if you’re already part of the media, to extend your expertise.

This course’s national and international orientation means you’ll use a full range of media technologies and gain insights into approaches to international relations. With an overlap or reduction of electives taken, the overall duration of completing the two degrees is reduced.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification/s that must be accredited to the equivalent Australian level specified in the table below.

INTERNATIONAL SUSTAINABLE TOURISM MANAGEMENT

Expert master’s, graduate certificate

Global demand is rising for highly skilled professionals in international tourism and related industries.

Studying a degree in sustainable tourism allows you to work in one of the fastest-growing industries, while simultaneously knowing how to reduce the impact of travel on local economies and environments. The program has a particular emphasis on emerging economies, and the development of small and medium-sized enterprises within them.

EXPERT MASTER’S

Our Master of International Sustainable Tourism Management will prepare you for a career in tourism management, planning, policy and sustainable development. You’ll develop specialised skills in all aspects of the international tourism industry, including tourism marketing and destination management.

This course draws on best practice within the tourism industry – including policy, governance and research – to develop a critical understanding of the relationships between tourism and sustainable development.

This truly global program will see you undertake field trips, investigate best practice international precedents and study alongside students from around the globe – helping to build the cross-cultural skills that underpin a successful career path in tourism.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification/s that must be accredited to the equivalent Australian level specified in the table below.

INTERPRETING AND TRANSLATION STUDIES

Professional entry master’s

Develop your practical and theoretical skills in translation and interpreting in English and a second language chosen from Chinese, French, German, Italian, Indonesian, Italian, Japanese, Korean, Russian or Spanish.

This course combines practical internships with rigorous academic foundations to give you both the conceptual skills and industry experience for a successful career. You’ll be able to articulate and apply knowledge of global best practice, and will be able to implement advanced reading, analytical and communication skills throughout your working life.

This course incorporates a minimum of 50 hours of professional internship to give you real-world experience that will be transferable to the workplace. By working alongside professionals in the field, you’ll develop work-relevant skills and a clearer understanding of the way in which theory relates to practice.

You will experience the opportunity to build networks and will significantly improve your graduate employability prospects.

As a Monash graduate, you’ll have the highest level of professional accreditation available within Australia.

Specialisations

Translation

This prepares you for work in areas where written translation and writing skills are needed, such as literary and cultural translation, cross-cultural communication, business, law, science and technology, publishing, editing or journalism.

You’ll work from your second (‘B’) language into your first (‘A’) language. You’ll also develop research methods, giving you the chance to pursue doctoral studies in translation studies if desired.

Interpreting and translation

This prepares you for work in areas where interpreting (for example, verbal translation) and cross-cultural skills are required, such as in healthcare, law, business or education technology, publishing, editing or journalism.

You’ll work from your second (‘B’) language into your first (‘A’) language. You’ll also develop research methods, giving you the chance to pursue doctoral studies in translation and interpreting.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry to this course, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

Industry endorsement

Our course is endorsed at the Certified Translators, Certified Advanced Translator, Certified Interpreter, Certified Specialised Interpreter (Legal), Certified Specialised Interpreter (Health), and Certified Conference Interpreter levels by the National Accreditation Authority for Translators and Interpreters (NAATI).

Monash is also the only university in Australia to be a member of the Conference Internationale Permanente d’Instituts Universitaires de Traducteurs et Interprètes (CIUTI), the world’s oldest and most prestigious international association of tertiary institutions offering degrees in translation and interpreting.

JOURNALISM

Expert master’s, graduate certificate

Help to inform and shape the future with a career in the innovative world of contemporary journalism.

Technology has transformed the traditional model of mainstream media – opening the most exciting opportunities for storytelling in the history of journalism.

EXPERT MASTER’S

Designed for people looking to establish a career as a journalist, or in related areas such as public relations, speechwriting or communications, this innovative course – taught by renowned industry experts in the Monash Media Lab – will prepare you for a dynamic career in the contemporary digital age.

Working with award-winning journalists and academics with strong industry links, you’ll gain expert skills in research and reporting in print, digital, radio and video, and explore the media’s evolving role in society.

Field schools

Add an international perspective to your studies with field trips to New York and Hong Kong to visit some of the world’s most prestigious media organisations, including the New York Times, Buzzfeed and Bloomberg. You’ll learn first-hand how newsrooms are adapting to the pressures of changing consumption patterns, delivery platforms and business models.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry to this course, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

**PUBLIC POLICY**

**Expert masters’, graduate certificate**

Develop your expertise to work in policy areas across both the public and private sectors, from government organisations and multinationals through to independent consultancies.

This program combines a focus on foundational knowledge and understanding of critical issues in public policy, governance and policy evaluation.

**EXPERT MASTER’S**

This program builds practical knowledge and skills for international professionals in policymaking and management across the spectrum of public sector activities. Combining expertise from across the University, the course will develop your understanding of the public and processes of policy formation, the delivery of policy programs, and the political and structural realities that can impact on such decision-making.

Through core units, you’ll acquire essential knowledge about public policy and how it’s best practised, and from there you can tailor the course to suit your career aspirations and interests. Using your course electives, you’ll have the opportunity to complete a public policy stream in one of the following areas: cultural and creative industries; diplomacy and international trade; health and social policy; organisational leadership; public administration; public finance; regulatory policy; sustainability and the environment; transport; urban policy.

**Entry requirements**

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

**GRADUATE CERTIFICATE**

Develop your leadership capacity for working with multicultural teams in intracultural environments. Your advanced critical thinking and analytical skills will be indispensable for delivering innovative solutions to policy-related challenges for both professional and non-professional audiences. The program develops a robust critical understanding of public and social policy. You’ll feel confident applying your knowledge to real-world professional contexts after the seminar and field trips, industry site reports and practice-based units. At the end of the course, you’ll be able to continue studies in the discipline with the Master of Public Policy.

**Entry requirements**

Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

**Monash English language level**

**EXPRESS LANGUAGE REQUIREMENTS**

1. A credit (60%) average is required in both qualifications.
2. Even if you’re eligible for a shorter course duration, you may elect to complete the longer duration.
3. Or qualification and/or experience, or satisfactory substitute, that the faculty considers to be equivalent.
4. Relevant fields include humanities or social sciences.
5. Australian graduate certificate for equivalent in a related field (anthropology or social sciences).
6. A credit (60%) average is required in both qualifications.

**COMMUNICATIONS MANAGEMENT**

**Expert masters’, graduate certificate**

Build your skills in advocacy, public relations, reputation management, crisis communications, and audience research and analytics.

Taught by a combination of leading academics and practitioners in the field, our Strategic Communications Management program has a strong practical focus and aligns closely with innovation taking place in the industry.

**EXPERT MASTER’S**

Drawing on best practices locally and globally, you’ll be equipped with the skills and knowledge to build effective communication and stakeholder engagement strategies, as well as the expertise to communicate with diverse audiences during and after a crisis within ethical frameworks. Through core units you’ll build a deep understanding of the application of big data and its role in areas such as determining audience sentiment.

You’ll have the opportunity to develop deep knowledge in key elective streams including: public policy and political communication; communication for social change and development; sports communication management; health communication management; leadership and entrepreneurship.

Your studies will be capped with the option of an industry fieldwork stream building skills for an industry placement as part of a major research project.

**Entry requirements**

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

**GRADUATE CERTIFICATE**

**Monash English language level**

Level A (see page 112).

**Monash English language level**

Level A (see page 112).

**Double master’s program**

Combine this master’s with the Master of Journalism from Shanghai Jiaotong University, China.
ACCOUNTING

Expert master’s

Focus on specific fields of accounting, develop high-level expertise, and take the next step in your career.

If your undergraduate degree has inspired you to take your study further and gain advanced knowledge and expertise across the field of accounting, this is your opportunity.

In this master’s degree, you’ll gain the skills to successfully operate in specialist areas, such as financial, strategic, or forensic accounting. You’ll also combine research with practical experience, and cover the latest applications to further develop your accounting expertise.

Accreditation and professional recognition

Students who complete this course can acquire the Chartered Institute of Management Accountants (CIMA) professional qualification at the same time. Monash-CIMA pathway units provide exemptions for all CIMA papers, except the Strategic Case Study Exam.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualifications that must be accredited to the equivalent Australian level specified in the table below. You’ll be ranked and selected based on your entire academic record.

Additional requirements

You must also submit a one-page candidate statement in which you’re required to demonstrate that you possess the motivation and academic skills required to successfully complete the program.

Monash English language level Level A (see page 112).

PROFESSIONAL ACCOUNTING AND BUSINESS LAW

Expert double master’s

This advanced double degree will develop your skills to address the wide-range of legal issues in contemporary business.

You’ll focus on specific fields of accounting practice alongside study of the legal environment and its effect on business practice in corporate governance, financial regulation, compliance and taxation.

Entry requirement

Selection is based on your previous academic achievement in your prior qualifications that must be accredited to the equivalent Australian level specified in the table below. You’ll be ranked and selected based on your entire academic record.

Monash English language level Level A (see page 112).
ACTUARIAL STUDIES

Expert master’s

Be ready to practise as an actuary across actuarial or risk management fields, and develop your wider business awareness skills, including communication and critical thinking.

For many companies, measuring risk is incredibly difficult yet fundamental to success. In this course you’ll gain advanced expertise in statistics, econometrics, finance, economics and mathematics, and these specialist skills could provide exponential career advancement. Designed for technical, mathematical and scientific graduates, as well as professionals in the early stages of their careers, you’ll develop your proficiency in advanced analytical and mathematical systems, and learn to apply your knowledge in the complex worlds of economics, econometrics, business modelling and finance.

Accreditation and professional recognition

This program may include exemptions for the Actuaries Institute Foundation Program and some of the Actuary Program.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification/s that must be accredited to the equivalent Australian level specified in the table below. You’ll be ranked and selected based on your entire academic record.

It’s important to note that the granting of exemptions from particular subjects may affect your ability to gain Actuaries Institute exemptions.

ADVANCED FINANCE

Expert master’s

Study the latest theories, practices and models that will shape the future of the finance sector.

If you’re a recent finance graduate or a professional already working in the finance industry, this course will give you advanced insight into global financial markets, funds management, corporate finance, financial modelling and risk management. The study options within this course offer a variety of distinct pathways, depending on your career aspirations.

You can either undertake a master’s coursework degree, with the chance to explore fintech, environmental finance and big data, or pursue a research pathway, which can lead to a PhD.

You’ll learn from leading academics in the field of finance as well as industry experts. Your studies will also have an ethics, environmental and corporate social responsibility focus. As the largest business school in Australia, we offer state-of-the-art teaching facilities. As part of this course you can access our Simulated Teaching and Research Laboratory (STARlab) and use market simulation programs to enhance your decision-making ability.

Accreditation and professional recognition

This course is endorsed by the CFA Institute, the global association for investment professionals, which awards the international Chartered Financial Analyst designation.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification/s that must be accredited to the equivalent Australian level specified in the table below. You’ll be ranked and selected based on your entire academic record.

1 In equivalent Monash University grading scale terms, or a 70% scale where 50% is a pass.
2 Even if you’re eligible for a shorter course duration, you may elect to complete the longer duration.
3 Related fields are technical, mathematical or scientific disciplines.
4 Exemption and/or experience, or satisfactory substitute, that the faculty considers to be equivalent.
5 Depending on the research path that you undertake, you may be required to enrol in 4th year if you are not eligible for entry to the Research Coordinator and the Higher Degrees Research Director.
6 Students seeking to undertake the research pathway must maintain an average of 65% and be accepted for entry by the Course Coordinator and the Higher Degrees Research Director.
7 Or qualification and/or experience, or satisfactory substitute, that the faculty considers to be equivalent.
APPLIED ECONOMICS AND ECONOMETRICS

Expert master’s

Develop your career in economics or econometrics, gain advanced analytical and technical skills required for the profession, and establish a solid grounding in key business disciplines.

In this course, you’ll have the opportunity to build your knowledge in one of the following specialisations:

- applied econometrics
- applied economics and econometrics
- business economics.

With a comprehensive theoretical and practical curriculum across your chosen field, you’ll develop expertise in applied economic and econometric tools to apply to projects in different sectors. You’ll also have the opportunity to undertake independent research during the course of your studies.

In addition, the applied econometrics and business econometrics streams have a PhD pathway, preparing you for doctoral study.

Specialisations

Applied econometrics

Learn the latest techniques regarding statistical analysis and econometric modelling, and apply them to data analysis in business, economics, and finance. You’ll build your numerical skills using a range of econometric techniques – and use your skills to design and implement econometric projects in different sectors.

Applied economics and econometrics

This specialisation gives you the chance to develop your research capabilities, and prepares you to work as a professional economist in public and private sectors, financial institutions and consulting firms.

Business economics

This stream explores the ways individuals, households, businesses and governments make decisions in allocating resources. It enables you to understand the economic and decision-making process within the business environment. You’ll cover different business strategies, competition policy-related issues, project evaluation, pricing, and risk and regulation.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below. You’ll be ranked and selected based on your entire academic record.

Entry requirements

Gain a thorough understanding of the banking and finance industry – even if you’re new to it.

This course is designed for those with limited previous knowledge of banking and finance, or those wanting to enter the industry.

You’ll cover banking systems, money markets, financial management, financial modelling, investments, lending, and risk management. And throughout your degree, it’ll come together to form a practical skill set – including critical thinking and communication skills – that you can use immediately in the changing financial world.

As the largest business school in Australia, we offer state-of-the-art teaching facilities. As part of your studies, you can access our Simulated Teaching and Research Laboratory and use market simulation programs to enhance your decision-making ability.

BUSINESS

Are you a recent graduate wanting to become a business leader? No matter where your professional interests lie, having a solid background in business will help you go further.

Develop your leadership and interpersonal skills, and transform the way you operate in professional contexts with our forward-thinking business program. At Monash, we'll help you build the practical skills and industry-based knowledge crucial for today’s complex and dynamic business environment.

EXPERT MASTER’S RANKED TOP 40 IN THE WORLD
New University Rankings by Complete (2019)
RANKED ABOVE WORLD STANDARD

Certificate in Research for Australia Report of 2015-2018

Monash Business School is one of the few business schools in the world to have achieved the esteemed ‘triple accreditation’ of AMBA, EQUIS and AACSB.

Our Master’s programs offer you the option to do a mix of units you’re passionate about and keep your studies broad, or you can choose units to tailor your study to a specific area of business.

Contemporary management
Cover contemporary approaches to leadership, innovation and communication, and learn to apply them in cross-cultural, multidimensional working environments.

Entrepreneurship
You’ll gain practical insight into what actually goes on behind the scenes of a start-up, gauge how new businesses form and flourish, and then learn what it takes to do it for yourself.

International business
Explore business in a global context. You’ll cover international management, law, finance, economics, marketing and strategy, while building key analytical and communications skills along the way.

Marketing
Examine buyer behaviour, integrated marketing communication, marketing research, relationship marketing, innovation, planning and assessing marketing performance, and learn how to bring together all these pieces to create and manage marketing campaigns in any industry.

Responsible business governance
A strong business culture starts with responsible governance. You’ll learn the ins-and-outs of domestic, regional and international trade, and develop an understanding of the shifting business ethics, sustainability and human rights issues of our time.

Financial risk management
Explore the latest practices and strategies behind enterprise-wide risk management in today’s increasingly complex business structures. You’ll also look at how risk management can be used to drive value within different organisations, leading to stronger and more prosperous businesses overall.

GRADUATE CERTIFICATE
We’ve curated a range of contemporary business themes to help you get where you’re going. From banking and business to marketing and management, there’s a pathway for everyone. And while our graduate certificate is a qualification on its own, it can bring you a step closer to completing a master’s if you decide to take your study further.

Entry requirements
Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below. You’ll be ranked and selected based on your entire academic record.

BUSINESS ADMINISTRATION

Expert master’s

Our Master of Business Administration (MBA) involves experience-based modules, consulting projects, and overseas learning and industry engagement opportunities.

The Monash MBA takes a strategic and practice-based approach to management development. It’s designed for ambitious young professionals with a minimum of three years’ business experience.

Working closely with leading professors, business executives and project supervisors, you’ll consult directly with business organisations throughout the program. Live projects on strategy, technology development and entrepreneurship are incorporated into the curriculum, and an international business project and strategy capstone complete the journey.

Study is undertaken in a combination of daytime, evening, weekend and intensive modes, which allows you to continue working while completing your program.

Entry requirements
Selection is based on your previous academic achievement in your prior qualification. You’ll be ranked and selected based on your academic record and professional experience and potential.

ELIGIBILITY

Graduate completion of a bachelor’s degree (or equivalent) in any field – three years’ work experience with at least one year of managerial experience

Additional requirements
• Detailed curriculum vitae
• Statement of purpose.
• Shortlisted applicants will be invited to an interview.

Monash English language level
Level A (see page 112).

BUSINESS ANALYTICS

Expert master’s

Throw on a sceptic’s hat and an explorer’s backpack and – armed with computational statistical tools – bust myths, validate news, or provide evidence for decisions in the face of uncertainty.

In this course, you’ll learn world-leading techniques, and rigorous foundations in statistical thinking, probabilistic modelling and computational techniques. It’s a hands-on program, where you’ll learn how to solve problems, analyse and interpret data, as well as collect, tidy, visualise and build recipes with fresh and local data that tell you about your world. You’ll also have an opportunity to make web apps and interactive graphics to communicate interesting patterns and stories.

Your instructors are global experts in the field of data-driven decision-making, with active and globally connected research programs. And as part of a small and elite program, you’ll work closely with your instructors, resulting in more personalised assistance with your career development.

Entry requirements
Depending on your prior qualifications, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below. You’ll be ranked and selected based on your entire academic record.

COMMERCE

Expert master’s

This program has been developed for high achievers who have completed a degree in banking, finance or a related area.

It’s a prestigious program that combines coursework and research, and involves undertaking research methodology training and carrying out independent research projects in banking and finance.

As part of this program, you’ll also work closely with a supervisor who will provide you with individual guidance and academic counselling.

This program can act as a research pathway, and is ideal if you’re interested in pursuing a PhD, as it will give you the opportunity to demonstrate your advanced research, analytics and communication skills.

Entry requirements
Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below. You’ll be ranked and selected based on your entire academic record.

Shortlisted applicants will be invited to attend an interview with a panel constituted by the research director. Admission is a competitive process.
GLOBAL BUSINESS
Expert master's
Enrich your business experience with global insight.
You’ll advance your knowledge of business and how it interacts with the global environment by studying business strategy, trade policy, global trade law, geopolitics, sustainability and intercultural communication.
Flexibility is a key component of the master’s course, so you can choose your electives from a broad range of units across the Business School and University. You can also focus your elective choices in a specific area or select from a broad range of areas, including management, marketing, public policy, data analytics, entrepreneurship, sustainability, diplomacy and languages.
In partnership with the Haas School of Business at University of California, Berkeley, you can access the Berkeley Haas Global Access Program. The program includes in-class learning, visits to Silicon Valley, one-on-one coaching, networking events with Berkeley students, and inspiring talks with Berkeley Haas academics. All students receive a Berkeley Haas certificate, and students who complete two semesters of the program become eligible to work in the US.

Entry requirements
Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below. GLOBAL EXECUTIVE BUSINESS ADMINISTRATION
Expert master’s
The Monash Global Executive Master of Business Administration is an intensive 15-month program for experienced managers, featuring international residential modules and a series of weekend modules.

Entry requirements
Selection is based on your previous academic achievement in your prior qualification(s). You’ll be ranked and selected based on your academic record and professional experience and potential.

Successful completion of a bachelor’s degree (or equivalent) in any field + minimum 10 years’ management experience

Additional requirements
• Detailed curriculum vitae.
• Statement of purpose.
• Shortlisted applicants will be invited to an interview.

Monash English language level
Level A (see page 112).

1 Students wishing to undertake the research pathway must maintain at least a 70 Weighted Average Mark and be accepted for entry by the Course Director and the Higher Degrees Research Director.
2 In equivalent Monash University grading terms, a 100% scale where 50% is a pass.
3 Even if you’re eligible for a shorter course duration, you may elect to complete the longer duration.
4 Related fields include international business.

1 Applicants should be in current employment in order to apply ideas in practice and to share executive experiences.
**MANAGEMENT**

**Expert master’s**

Sharpen your leadership and interpersonal skills, and develop practical techniques to excel in higher managerial roles in any field.

You’ll learn to inspire those around you and achieve greater productivity from employees, in a range of dynamic working environments. You’ll also develop specialist knowledge to understand complex management and human resource management issues by studying one of two streams on offer.

**Managing organisations**

Discover the fundamentals of leadership in the 21st century and gain advanced skills in problem-solving and decision-making. You’ll learn how to manage organisational change from a theoretical and practical perspective, as well as process models for organisational development and transformation. You’ll also gain skills in strategic management, and understand how to craft strategy supported by structure, controls and rewards.

**People, culture and human resource strategy**

Learn how to manage people in a global workforce, and understand work and employment relations in a changing and dynamic environment. In this stream, you’ll focus on management and career development, and gain a solid understanding of the theories and practices that underpin talent management. You’ll also examine the potential impacts of digitalisation and artificial intelligence on the sector, and learn how to use data analytics to improve HR strategy within your organisation.

**Entry requirements**

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below. You’ll be ranked and selected based on your entire academic record.

---

**MARKETING**

**Expert master’s**

This course is designed to help marketing professionals get ahead of the curve and make a positive impact on business and society.

You’ll build a toolkit of the techniques, frameworks and strategies necessary for a competent, responsible and effective marketing leader. You’ll be taught by leading academics and industry experts, and study the latest theories and research influencing the industry, including topics on advertising, company strategy and value creation.

All core units are offered online or on campus, with day and evening classes also available.

If you’re currently working, the flexible study program allows you to work and learn at the same time, with day and evening classes also available.

**Entry requirements**

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below. **Additional requirements**

In addition to the eligibility requirements, you’ll also need to provide:

* your curriculum vitae, including two referees
* a one-page statement of purpose.

**Monash English language level**

Level A (see page 112).

---

1. Students wishing to undertake this research pathway must maintain at least a weighted average mark of 70 and be accepted for entry by the Course Director and the Higher Degrees Research Director.
2. In equivalent Monash University grading scales terms, a 70% scale where 50% is a pass.
3. If you’re eligible for a shorter course duration, you may elect to complete the longer duration.
4. Relevant fields include management.
5. Relevant fields include management.
REGULATION AND COMPLIANCE

Expert master’s

This is a future-focused, innovation-led course designed to provide you with the skills needed to navigate regulatory compliance within an increasingly complex corporate environment.

Designed in conjunction with industry experts, this course will equip you to manage beyond compliance, through exposure to international best practice and the latest regulatory technologies. You’ll also discover how to identify key risks within businesses, and gain an understanding of the contemporary regulatory and compliance environment in which business operates.

You can focus on one discipline or select from a range of discipline-specific regulation-oriented electives in the areas of: financial services; sustainability and the environment; employment and human resources; global enterprise; artificial intelligence and new technologies; and ethics and risk management.

Entry requirements

Depending on your prior qualifications you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

You’ll be ranked and selected based on your entire academic record.

COUNSELLING

Professional entry master’s

Providing you with a professional qualification, and offering a combination of theory and professional experience, this course equips you with all you need to start a rewarding career as a counselor.

This course suits those from a range of professions, such as human resources, health, social welfare and education, and is taught by academics with extensive experience working as counselors and psychologists.

The course draws on the latest thinking and approaches to counselling and psychotherapy to develop your understanding of the mental health issues that arise across a lifetime. You’ll examine the various forms of professional counseling, including online and distance counseling, child and adolescent counseling, and individual, couples and group counseling.

You’ll have the chance to develop your skills by completing 250 hours of professional experience, which includes contact and non-contact hours. Non-contact hours include any counseling-related duties associated with the placement centre that don’t involve counseling clients.

Recent placements have included wellbeing settings within early childhood centres, schools and tertiary settings, community health centres and organizations such as Arnica, Headspace, Launch Housing and SkillPlus.

As a Master of Counselling graduate you’ll work across many fields, including careers counselling, education, child and family services, child protection services, health policy, family counselling, health services management, and rehabilitation counseling.

3 Related fields include counselling, psychology, and social work.
EDUCATION

Expert master’s

This course addresses the professional learning needs of educators, educational administrators, managers and others interested or involved in learning and education, both locally and internationally.

The Master of Education looks at learning in schools, workplaces and community, and connects research and practice to make you a stronger thinker, an engaged practitioner and an advanced specialist.

You’ll broaden your knowledge of key learning constructs and deepen your understanding in specialist areas. You can choose general education studies and select units to suit your requirements, or choose one of the specialisations and gain a qualification highlighting your expertise.

This course doesn’t provide a recognised initial teaching qualification. Students seeking an initial teaching qualification should refer to the Master of Teaching course.

Specialisations

Adult learning
This specialisation focuses on ways to lead and develop learners and their learning — in workplaces, communities, and local, global and virtual spaces. You’ll be offered ideas and approaches to enable participation and learning, through formal and non-formal means, and to expand practice and skill development in communities. You’ll look at contemporary theories, approaches and concepts around lifelong learning and participation.

As a graduate, you’ll be well-positioned to manage, deliver and administer learning in workplaces, communities, tertiary and vocational education.

Applied behaviour analysis
This is for those interested in the principles and practice of applied behaviour analysis in clinical, school and work settings, as well as those aiming to become a Board Certified Behaviour Analyst (BCBA). You’ll gain knowledge and expertise in the principles of behaviour modification and their application, the identification and assessment of behaviours, evidence-based practices for behaviour analysts, experimental design for research into behaviour analysis, and professional ethics in behaviour analysis.

The Behaviour Analyst Certification Board Inc. has verified this course sequence as meeting the BCBA examination. Applicants will have to meet coursework requirements for eligibility to take the BCBA examination. Applicants will have to meet coursework requirements for eligibility to take the BCBA examination.

Digital learning
This focuses on the issues regarding digital technology in education, and applying technology practices for learning. Aimed at professionals in schools, tertiary education, workplace or community settings, you’ll learn how best to design, facilitate and assess the use of digital technologies in teaching and learning.

Early childhood education
There’s a growing worldwide need to build the expertise of professionals in the early childhood sector. Your ability to lead educational work, innovative curriculum, teaching and policy, and professional learning in early childhood contexts will grow through your studies, and you’ll be ready to pursue senior roles in early childhood education, policy, leadership and management.

Educational leadership and policy
In this specialisation, you’ll focus on leadership practices and policy development in educational contexts. It’s suited to those interested in leading educational initiatives and institutions, and expanding your knowledge of how to lead educational organisations. You’ll evaluate the factors that contribute to maintaining and sustaining such organisations, including human intellect, knowledge, values, emotion, learning, and organisational culture and climate. On graduating, you’ll have developed your capability to improve organisations’ problem-solving and decision-making processes.

Expert teaching practice
Deepen your knowledge and practice of teaching and learning in various areas of your interest. This specialisation is suited to professionals from schools, tertiary education, workplaces or community organisations and groups. You’ll be able to focus your studies in the areas of:

- adult education
- educational technologies
- gifted education
- information and communication technologies
- language and literacy
- mathematics and science
- music

General education studies
This stream allows you to further your professional interests by choosing from a wide variety of subjects in the education field. You can select your preferred units from across all the specialisations, building a course to satisfy your specific professional and personal interests. You’ll explore relationships between research and practice in the context of your choice, such as school, vocational, tertiary, workplace and community. As a graduate, you’ll be well-placed to pursue senior leadership and management roles in various educational settings.

Inclusive and special education
In this specialisation, you’ll focus on building inclusive learning environments. You’ll study theories of, and approaches to, inclusion of diverse learners with particular cultural, social, cognitive and behavioural needs. You’ll discover ways that education can be transformed to include all learners, regardless of their age, sexuality, gender, class, ethnicity and disability. After graduating, you’ll be able to develop effective ways to promote learners with diverse needs in a range of learning situations.

Registered teachers who complete this course will be qualified as special education teachers.

Entry requirements
Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

EDUCATIONAL AND DEVELOPMENTAL PSYCHOLOGY

**Professional entry's**

Educational and developmental psychologists focus on how people develop and learn throughout their lifetime. They work with individuals, families, groups and organisations, and have varying roles such as school psychologist, guidance officer, and child and adolescent counselor. They conduct psychological and educational assessments and instructional planning for exceptional children, adolescents and adults.

Our Master of Educational and Developmental Psychology is accredited by the Australian Psychology Accreditation Council (APAC), as a fifth and sixth-year sequence in psychology that prepares you to practice as an educational and developmental psychologist in settings such as schools, health and welfare services, care facilities and businesses.

You’ll apply theory to practice with 1000 hours of supervised professional experience in a range of settings. In a research thesis, you’ll develop an evidence-based approach to working with children to design, develop and learn throughout their lifetime.

### Entry requirements

Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

<table>
<thead>
<tr>
<th>Eligibility</th>
<th>Average requirements</th>
<th>Duration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Distinction</td>
<td>(70%)</td>
<td>2</td>
</tr>
</tbody>
</table>

### Additional requirements

In addition, you must provide evidence of demonstrated suitability for work as a professional psychologist, determined by the completion of a supplementary form and satisfactory referee reports (one academic, one professional), relevant voluntary or paid work experience, and an interview.

**Applicant checks:**

- Working with Children Check (before placement)
- Provisional registration with the PsyBA (before commencing study, and maintain such registration throughout the period of enrolment).

**Applicant checks for off-campus professional experience activities**

This course requires you undertake mandatory off-campus professional experience activities. In order to do this, you’ll need to:

- submit proof of your registration with the PsyBA
- meet the specific security clearances that apply in whichever state/territory your professional experience is being undertaken
- complete professional experience orientation provided by the faculty.

If you have international qualifications you need to have your qualifications assessed by the APAC; visit [www.psychology.org.au](http://www.psychology.org.au).

You must also meet the English language requirements of Monash University and the PsyBA. Consult the PsyBA website to ensure you meet these requirements: [www.psychologyboard.gov.au](http://www.psychologyboard.gov.au)

### CRICOS:

038585A

1. Are you an aspiring or practising educational leader?

This course will develop your professional knowledge and skills, to enhance your leadership in a globalised world.

You’ll explore and understand educational leadership in diverse contexts. The range of units available will enhance your capacity to act critically and creatively to address the challenges posed in an increasingly complex, diverse and technologically rich world.

In this course you’ll consider various constructs of leadership, including traditional and emergent leadership theories, cultural manifestations of leadership, the role of social justice in educational settings, and persistent challenges facing leaders.

You’ll gain an understanding of how leadership interacts with, and responds to, the dynamics of policy, politics and power in differing contexts, and how this shapes education and learning.

In your final semester, you’ll immerse yourself in a project tailored to your specific interests, which will deepen and enhance your learning, and prepare you for the next step in your career.

### Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

EDUCATIONAL RESEARCH

Graduate certificate

This course is aimed at high achievers in education wanting to take on a graduate research degree, such as a research master’s degree or a PhD, but who don’t have sufficient previous research experience.

It’s designed as a pathway course to prepare you to undertake research at a graduate level. You’ll learn about research methodology, design and ethics as you plan and conduct a research study that can lead to a graduate research course.

Completion of this course to a high standard positions you to apply for a PhD or master’s by research in the field of education.

Entry requirements

Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

EDUCATION STUDIES

Graduate certificate

Designed to introduce you to the field of education at a graduate level, this course is suited to those with a first qualification in a discipline other than education.

It’s also a pathway for those who don’t meet the entry requirements for the Master of Education, Master of Educational Leadership, or Master of TESOL.

This course gives you an understanding of concepts and issues in education, locally and globally, and allows you to build your knowledge of major theoretical and professional debates in specialist areas.

Course completion allows you to pursue education-related careers and/or further study in education.

Entry requirements

Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

PROFESSIONAL PSYCHOLOGY

Professional entry master’s

This course is designed to meet the requirements of the Australian Psychology Accreditation Council (APAC) and the Australian Health Practitioner Regulation Agency for a generalist fifth year in psychology.

This course equips psychology graduates with the advanced psychotherapeutic skills required for general registration as a psychologist. It develops your professional capability to apply the theoretical, research, assessment and therapeutic skills involved in psychology.

You’ll develop expertise in applying counseling theories and practices through your understanding of evidence-based psychotropics. You’ll learn core skills and theoretical concepts of the therapeutic process, and extend your practical knowledge in counselling interventions as you develop therapeutic relationships with a range of client groups. You’ll acquire the skills to administer, score, interpret and report on a range of psychological tests and assessments.

You’ll engage with the Australian Psychological Society code of ethics, and explore ethical dilemmas to support your practice in undertaking research, educational or professional roles in different workplaces.

You’ll gain professional experience through 300 hours of supervised practice in the faculty’s on-campus clinical placements. On course completion, you’ll have the skills to undertake a final year of supervised practice in the field for general registration under the ‘5+1 internship model’ for registration. You’ll arrange a Psychology Board of Australia-approved one-year internship in a setting of your choosing.

Entry requirements

Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

<table>
<thead>
<tr>

Additional requirements

Applicant check:

• Working with Children Check (before placement)
• provisional registration with the Psychology Board of Australia (before commencing study, and maintain such registration throughout the period of enrolment).

If you have international qualifications you’ll need to have your qualifications assessed by the Australian Psychology Society (APS); visit www.psychology.org.au

You must also meet the English language requirements of Monash University and the Psychology Board of Australia (PsyBA). Consult the PsyBA website to ensure you meet these requirements: www.psychologyboard.gov.au

Monash English language level

Level D (see page 112).
PROFESSIONAL PSYCHOLOGY

Graduate diploma

This course is suited to those who want to pursue advanced graduate study in psychology at master’s or doctoral level, or to undertake supervised psychological practice.

By studying our Graduate Diploma of Professional Psychology, you’re offered advanced study of psychology, research training and an introduction to psychological practice.

You’ll be able to choose an elective from topics including developmental psychology and wellbeing, or positive psychology in professional practice. You’ll also conduct a supervised individual research project. After graduating, you can undertake further training and study needed for professional registration in psychology.

Entry requirements

Selection is based on your previous academic achievement in your prior qualification/s that must be accredited to the equivalent Australian level specified in the table below.

Professional recognition

Our psychology courses are accredited by the Australian Psychology Accreditation Council (APAC). Professional accreditation ensures those graduating from the courses hold degrees recognised by employers, and adhere to state and national accreditation standards.

STEM EDUCATION

Graduate certificate

This course is intended for those keen to practise or extend their capacity as a science, technology, engineering and mathematics (STEM) educator.

It will build your capacity to lead and support quality STEM education, and inspire your students’ engagement with STEM disciplines. You’ll explore the interplay between your own content and pedagogical knowledge, and how these influence your teaching and development of STEM initiatives. You’ll also develop leadership and research skills that inform and enhance the learning of STEM.

Entry requirements

Selection is based on your previous academic achievement in your prior qualification/s that must be accredited to the equivalent Australian level specified in the table below.

3 You need to have achieved a distinction (70%) in third-year psychology.

Professional recognition

Our psychology courses are accredited by the Australian Psychology Accreditation Council (APAC). Professional accreditation ensures those graduating from the courses hold degrees recognised by employers, and adhere to state and national accreditation standards.
TEACHING

Professional entry master’s

Do you have an undergraduate degree in any discipline, and want a career as a global educator and teacher?

Our curriculum combines theory and professional experience, giving you the skills and professional values to become an effective educator. You can choose to specialise in early childhood, primary or secondary education – or a combination. Through engagement with the latest thinking and practices, you’ll be able to effectively foster the learning of students with various ages and needs.

You’ll design learning experiences to ensure your future students’ progress in areas such as English, the arts and music, mathematics, physical education, health and wellbeing, science and humanities.

You’ll gain professional experience by completing a minimum of 60 days’ teaching practice throughout the course in urban, rural, remote or international settings and schools.

An education degree is an excellent basis for diverse careers in the classroom, government or private enterprise. As a Master of Teaching graduate, you’ll be ready to transform the lives of others through learning.

Additional requirements

All applicants must sit the GATPer test. GATPer is a requirement for many of the initial teacher education courses in Victoria. It’s a non-cognitive online test designed to assess an applicant’s personal and professional attributes. For further information on the test, visit monash.edu/education/caspertest

Enrolment considerations

✔ You’ll be required to undergo a Working with Children Check before being able to carry out professional experience placements.

✔ The Australian Institute for Teaching and School Leadership requires all students of initial teacher education courses to ‘achieve the standard’ in the National Literacy and Numeracy test prior to graduation.

Monash English language level

Level E (see page 112).

Professional recognition

The specialisations that include primary and/or secondary education are accredited by the Victorian Institute of Teaching. The specialisations that include early childhood education are accredited with the Australian Children’s Education and Care Quality Authority.

If you’re planning to register as a teacher or early childhood educator outside of Victoria, you should check registration requirements with local authorities in case there are additional requirements.
TESOL

Expert master’s

This course is suitable for a wide range of educators, prospective educators and other professionals working in the field of English language teaching, and leads to a graduate qualification in TESOL (Teaching English to Speakers of Other Languages).

It will prepare you for a wide range of language-related professional contexts in Australia and internationally, and will enable you to operate with confidence in a changing and increasingly internationalised world. This course will assist you in understanding the connections between theory and practice, and the importance of developing strong evidence-based principles in English language teaching and learning.

Graduates of the course have been successful in finding employment as language teachers and translators, and are also employed in TESOL leadership roles, such as director of studies, language school founder, and curriculum developer, in local, national and international locations.

This course doesn’t provide a recognised initial teaching qualification. Students seeking an initial teaching qualification should refer to the Master of Teaching course.

**Entry requirements**

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

ADVANCED ENGINEERING

Expert master’s

The Master of Advanced Engineering offers a competitive advantage that positions you to lead innovation and drive industry change in your chosen field of engineering.

As the No.1 engineering school in Australia for four consecutive years, Monash attracts outstanding academics, and offers innovative research facilities that you’ll use while completing your studies. The advanced engineering master’s course moves you beyond a base-level engineering qualification to explore your specialisation at an advanced level. It’s a key transitional stage in your career as an emerging business leader, designed to foster innovative thinking, entrepreneurship, leadership and professional development.

Generous study grants are available to help you achieve your master’s, starting from A$6000 and up to A$10,000 a year for Monash alumni.

The advanced master’s program offers 11 specialisations (see pages 66-67), including four cross-discipline specialisations. You can complete your master’s degree in just one year, or choose a two-year option. The two-year program includes a major design project where you can participate in a multidisciplinary team to develop solutions to real-world problems and further deepen your skills in the engineering field.

**Entry requirements**

**Monash English language level**

Level A (see page 112).

**Please note:** This course does not provide stage 1 engineering accreditation. Students seeking this accreditation should refer to the Master of Professional Engineering.

**Work-integrated learning**

Take your skills and knowledge further with an internship with one of our many partner organisations. The Work-integrated learning program placement provides a valuable opportunity to apply your skills, and gives you professional and industry experience that sets you apart.

1 In equivalent Monash University grading scale terms, a 150% scale where 50% is a pass.
2 Even if you’re eligible for a shorter course duration, you may need to complete the longer duration.
3 Related fields include education, linguistics and languages.

A$34,600

2019 fees p.a.

Table is per 48 credit points, which represents a standard full-time course load for a year.
Specialisations

Additive manufacturing

This specialisation will train you in the conceptualisation, design optimisation, manufacture and testing of additively manufactured parts made from both metals and polymers. The program will explore the commercial aspects in areas that range from medical devices, to specialist and one-off components, to large-scale semi-continuous manufacture. You’ll examine the material characteristics that result in successful, qualified additive manufacturing parts.

Chemical engineering

Ranked top 30 in the world

This course includes study areas such as advanced reaction engineering, process design and optimisation, conversion of biomass resources into fuel, materials and specialty chemicals, and nanostructured membranes for sustainable separations and energy production, with an emphasis on the latest developments.

Civil engineering (infrastructure systems)

Ranked top 30 in the world

As a Master of Advanced Civil Engineering (Infrastructure Systems) graduate, you’ll be ready to solve challenges in the design and operation of large-scale infrastructure systems, such as bridges, tunnels and pipe networks. You’ll be equipped with the advanced skills necessary for managing the problems posed by ageing infrastructure, and leading the designs of new interdisciplinary complex infrastructure systems.

Civil engineering (transport)

Ranked top 15 in the world

As a Master of Advanced Civil Engineering (Transport) addresses transport engineering and management, traffic engineering, intelligent transport systems and transport planning. It responds to the growing need for engineers with awareness of the characteristics of transport, including its technological, economic and social impact. You’ll also look at the latest transport engineering and emerging technology, and how it can solve problems in the planning, design, management and operation of transport facilities.

Civil engineering (water)

Top 40 in the world

The program deals with surface and ground water flow, stormwater management, water quality, flood forecasting and mitigation. It’s designed to give you skills to meet the challenges posed by changing climatic conditions on water resource management.

Electrical engineering

The Master of Advanced Electrical Engineering gives you a broad introduction to advanced techniques in signal processing, communications, digital systems and electronics. The course will mix theory and practice, and includes hands-on learning in laboratories, and team-based design projects. The units have been chosen around the common theme of embedded systems – special-purpose computing systems designed for specific applications. Embedded systems are found just about everywhere, including in consumer electronics, transport systems, medical equipment and sensor networks.

Energy and sustainability engineering (Malaysia only)

If you’re a qualified engineer keen to deepen your knowledge in the energy and sustainability area, the Master of Advanced Energy and Sustainability Engineering is for you. The course builds foundations in general engineering through engineering analysis and entrepreneurship units. You can major in this program by examining the energy and sustainability area from a multidisciplinary perspective. You can also choose elective units such as environment, air pollution control and smart grids to further enhance your knowledge, or undertake a minor research work to pursue a topic of related interest.

Materials engineering

This course focuses on the most up-to-date aspects of the field, along with the use of materials and their electronic, chemical and mechanical properties. It will prepare you to appreciate and exploit the role of materials in tackling the technical, economic and environmental problems in the design and construction of engineering structures, processes and devices.

Mechanical engineering

Most modern engineering projects are multidisciplinary in nature, and require a range of skills and perspectives to accomplish the task. The Master of Advanced Mechanical Engineering course takes a systems approach to the design, monitoring and performance of complex mechanical engineering systems in the fields of renewable energy, aerospace, buildings, transportation and biomedical devices. The systems approach also informs the course – four discipline-based core units are integrated so that common problems are examined from different perspectives, culminating in a sustainable systems unit.

Medical engineering

The Master of Advanced Medical Engineering allows you to focus on engineering design and the development of medical technologies. The specialisation concentrates on biotechnology and bioengineering, and medical devices and instrumentation. You’ll develop a knowledge of the human body and its workings, as well as the fundamentals of research, clinical practice and clinical trials of medical technologies. This specialisation addresses the growing needs of the medical technology industry by graduating engineers with an expertise in this field, along with a broad awareness of their clinical needs.

Renewable and sustainable energy engineering

This specialisation allows you to focus on sustainable energy technologies to address concerns about existing energy production. You’ll learn about the operation, benefits and limitations surrounding each of the major renewable energy technologies that play a key role in the growth of the emerging energy sector. You’ll develop an understanding of how such technologies modify existing electricity networks, and the markets in which they operate.

International double master programs

Monash Engineering offers three double master’s programs with Southeast University (SEU) China.

Studies are undertaken at the SEU-Monash campus in Suzhou, China, with the opportunity to undertake one semester of study at Monash University’s Clayton campus in Melbourne, Australia. The double master program takes 1.5 to 2.5 years of full-time study to complete (depending on the units chosen).

• Master of Civil Engineering (Water Management)
• Master of Industrial Chemical Engineering
• Master of Transportation Systems.
PROFESSIONAL ENGINEERING

Professional entry masters

Get the technical expertise and management skills you need to lead the way.

This course is designed for students who have completed undergraduate studies in engineering and are seeking an internationally recognised engineering qualification to practise as a professional engineer.

The Master of Professional Engineering provides knowledge to manage projects in an intercultural and multidisciplinary business environment. Engage in business and engineering-related activities through continuous professional development and the Work Integrated Learning program. Undertake an internship with one of our partner organisations for valuable professional and industry experience, and grow your networks. At Australia’s No.1 engineering school, you’ll have access to some of the world’s finest facilities, including the new maker space and the smart-technology enabled Woodside Building for Technology and Design.

Specialisations

Chemical engineering

Tackle our most pressing energy, environmental, and healthcare challenges by exploring industrial-scale processes that convert raw materials into commercial products. Enhance your leadership capacity with advanced knowledge of thermodynamics, reaction engineering, fluid dynamics, separation processes, and much more. Extend your technical expertise by choosing a stream in food engineering, bio-processing engineering or engineering design.

Civil engineering

As the world’s population explodes, we must adapt our built environment to modern life. Prepare for a top-level job in infrastructure – grow your expertise in the design of steel and timber structures, geomechanics, building technologies, bridge design, computational methods, and more. Acquire the technical knowledge essential to design, construct, improve and lead infrastructure projects. Focus on a particular area by selecting a stream in geomechanics, structure, transport or water.

Electrical engineering

In this diverse and rapidly changing technological field, you can innovate to improve our quality of life. Move to the forefront by expanding your understanding of signal processing, electronic design, electromagnetics and antennas, real-time system design, multimedia communications, smart grids, and much more. Put theory into hands-on practice in laboratory sessions and team-based design projects.

Materials engineering

Make things stronger, lighter, cheaper, more functional and more sustainable. By improving existing materials, or creating entirely new ones, you lay the groundwork for broader applications and novel technologies. Advance your career by delving into polymeric materials, energy technologies, environmental durability, material characterisation, biomaterials and biomechanics, additive manufacturing, sustainability, and much more, in units taught by industry experts.

Mechanical engineering

Advance your knowledge of mechanical systems design, biomedical imaging and sensing, additive manufacturing, instrumentation sensing and monitoring, systems performance analysis, sustainability engineering, entrepreneurship, and more. Gain the strong understanding of thermal and mechanical components and processes to move technology forward.

COURSE CODE:

E6011

DEGREE AWARDED

• Master of Professional Engineering
• Master of Professional Civil Engineering
• Master of Professional Electrical Engineering
• Master of Professional Materials Engineering
• Master of Professional Mechanical Engineering

To support you achieving your masters, generous academic merit scholarships of A$10,000 per year are available to eligible students.

BIOPRODUCT MANUFACTURING ENGINEERING

Expert master’s

Bioproduct manufacturing is an emerging and fast-growing industry. With the increasing challenges of resource scarcity and environmental pollution, there’s a strong global demand for bioproduct engineers who can design sustainable and environmentally friendly materials and energy-efficient sources.

With a Master of Bioproduct Manufacturing Engineering, you’ll be well-equipped to play a vital role in shaping the transformative technologies of the future in the sustainable global bioeconomy.

You’ll integrate core engineering principles with specialist topics in the field of bioresource processing, gain enhanced technical and research skills, and develop the entrepreneurial acumen sought by a broad range of industries, particularly local and international bio-based industries.

This program is delivered online. There are no classes to attend, making it ideal to combine full-time work with part-time study and maintain your professional career.

Monash English language level

Level A (see page 112).

1 In equivalent Monash University grading scale terms, a 100% scale where 50% is a pass.
2 Relevant fields include chemical, materials, mechanical, physics, mechatronics and biology.
3 Relevant work experience in process engineering and related research and development. Please submit a CV which outlines the nature of your work experience and includes your job title, organisations (include the URL) and department, description of your work and the nature of the skills required, including any research skills. Along with your CV, please submit one original employment reference which supports the details in your CV.
4 Applicants with a non-related discipline degree must demonstrate competency in applied maths and chemistry.
The 21st century presents a vital challenge for civil engineering. As infrastructure grows older, the need for a strategic maintenance plan to prolong use becomes greater.

The planning, design, construction and maintenance of infrastructure is crucial to the global economy. Skilled professionals are required to maintain ageing infrastructure, integrate new infrastructure into existing systems, and expand existing infrastructure – and it must be done in a way that’s socially, environmentally and financially sustainable. Our Master of Infrastructure Engineering and Management equips you to take on these challenges.

### Entry requirements

**Option 1**

Bachelor’s degree (or equivalent) in engineering or a related field

**Duration**: 1-1.5 years

**ELIGIBILITY**

- Bachelor’s degree (or equivalent) in engineering or a related field: 1.5 years
- Bachelor’s (honours) degree (or equivalent) in engineering or a related field: 1 year

**Monash English language level**

**Level A** (see page 111).

1. Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration.

---

**TRANSPORT AND TRAFFIC**

**Expert master’s**

Traffic congestion, safety, environmental impacts and the efficiency of transport operations are global concerns. With transport systems under pressure to deliver better economic, social and environmental results for the community, there’s a growing demand for professionals prepared to tackle these challenges.

Our Master of Transport and Traffic responds to the need for engineers with transport expertise, including its technological, economic and social effects.

This program is delivered online. There are no classes to attend, making it ideal for students who wish to combine full-time work with part-time study.

**Entry requirements**

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration.

**ELIGIBILITY**

- Bachelor’s degree (or equivalent) in a related field: 1.5 years
- Bachelor’s (honours) degree (or equivalent) in a related field: 1 year

**Monash English language level**

**Level A** (see page 112).

1. Even if you’re eligible for entry credit, you don’t need to take it.

---

**ALTERNATIVE EXITS**

- Graduate Certificate of Infrastructure Engineering and Management
- Graduate Diploma of Infrastructure Engineering and Management

**DEGREE AWARDED**

Master of Transport and Traffic

**COURSE CODE:** E6002

**CRICOS:** Not applicable

ARTIFICIAL INTELLIGENCE

Expert master’s

The potential of AI is infinite. AI has the ability to transform every aspect of our lives – from cars driving themselves to robots performing complex surgery. AI can help to predict the path of bushfires, detect early-stage skin cancers, and counteract false and polarising information on social media. It informs business decisions, optimises operations, and drives outcomes of leading companies.

Monash is the only university among the prestigious Group of Eight to offer the Master of AI. This course will equip you with the skills and knowledge to achieve innovative outcomes. Under the guidance of internationally recognised experts, you’ll have an opportunity to apply your knowledge to real-world challenges and influence a range of industries from healthcare and agriculture to manufacturing.

**Entry requirements**

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification/s that must be accredited to the equivalent Australian level specified in the table below.

BUSINESS INFORMATION SYSTEMS

Expert master’s

Solve business information challenges through IT, offer strategic guidance, and become integral to many organisations.

The course covers the IT business spectrum, from supporting business operations to informing decision-making. It’ll get you ready for roles such as business analyst, systems analyst or project leader, or as an information manager or archivist.

The course features core studies in IT project management, and offers specialist units in business information systems and a wide range of elective choices. You’ll complete one of the following three specialisations available in this course:

- **business information systems**
- **archives and record keeping**
- **library information science**

In your final semesters, you have the opportunity to complete an industry experience project or research thesis. Apply for the Industry Experience Program, to gain hands-on real-world experience, or apply for a scholarship placement in the highly regarded Monash Industry Team Initiative.

**Entry requirements**

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification/s that must be accredited to the equivalent Australian level specified in the table below.

INFORMATION TECHNOLOGY

COURSE CODE: C4006
Graduate Certificate of Information Technology

DEGREE AWARDED
Master of Information Technology

ALTERNATIVE EXITS
• Graduate Certificate of Information Technology
• Graduate Diploma of Information Technology

Expert master’s

The Master of Information Technology provides the knowledge and skills to solve real-world problems with the latest technology.

This course features case studies in IT project management and software engineering, and offers a range of elective choices spanning data management technology, mobile and distributed systems, machine learning, cloud computing and cybersecurity.

With a Master of Information Technology, you could become a software engineer, an enterprise data architect, a mobile systems analyst, a cloud consultant, or even a chief technology officer.

In your final semesters, you can choose to complete an industry experience project or research thesis. You can either apply for the Industry Experience Program, to gain hands-on real-world IT experience, or apply for a scholarship place over summer in the highly regarded Monash Industry Team Initiative.

Entry requirements

AUSTRALIAN LAW

Graduate diploma | For law graduates

Do you already have a law qualification from a non-Australian jurisdiction? If so, the Graduate Diploma of Australian Law will provide you with the academic eligibility needed to be eligible for admission in Victoria.

The course comprises three components: an introduction to the Australian legal system, core law units required for admission to practice in Victoria, and law elective units. The number of credit points and selection of core units will depend on the jurisdiction in which you earned your existing law qualification.

Entry requirements

Selection is based on your previous academic achievement in your prior qualification/s.

<table>
<thead>
<tr>
<th>Eligibility</th>

<td>0.5</td>
</tr>
</tbody>
</table>

Additional requirements

A 500 to 1000-word research proposal and a detailed resume listing your qualifications, work experience and details of two recent referees are also required as part of the application.

Monash English language level

Level A (see page 112).

INFORMATION TECHNOLOGY RESEARCH

Graduate certificate

Study this course for a pathway to higher-level research in IT. Our Graduate Certificate of Information Technology Research is suited to high-achieving students who’ve completed a relevant undergraduate and coursework master’s degree, but don’t have a research component in order to progress.

You’ll undertake research methodology training and carry out an independent research project on a selected topic, working closely with a supervisor who’ll provide you with guidance and academic counselling.

Entry requirements

Selection is based on your previous academic achievement in your prior qualification/s that must be accredited to the equivalent Australian level specified in the table below:

<table>
<thead>
<tr>
<th>Eligibility</th>
<th>Average requirements</th>
<th>Duration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bachelor’s degree or equivalent + master’s coursework degree for equivalent in information technology or a related field</td>

</tr>
</tbody>
</table>

Additional requirements

A 500 to 1000-word research proposal and a detailed resume listing your qualifications, work experience and details of two recent referees are also required as part of the application.

Monash English language level

Level A (see page 112).
**JURIS DOCTOR**

Professional entry master’s | For non-law graduates

Our Juris Doctor (JD) is an intensive, graduate-entry law degree designed for non-law graduates.

It develops advanced professional skills in problem-solving, critical thinking, research, communication, collaboration, self-management, ethical awareness and professional judgement.

The JD recognises the specific needs of graduate entrants, and teaches the skills available only from one of Australia’s leading law schools. Small class sizes and innovative teaching promote interactivity and in-depth learning.

Monash Law now offers a guaranteed clinical education experience for all students who wish to incorporate a practical component credited towards their Monash Law degree.

This degree satisfies the academic requirements for admission to practice as an Australian lawyer.

**Entry requirements**

Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

**ELIGIBILITY**

You must satisfy one of the following three options:

- Bachelor’s degree (or equivalent) in any field with at least a GPA of 4.0 on a 7-point scale (or equivalent credit average) and
- A minimum GPA of 5.0 on a 7-point scale (or equivalent credit average) in the law studies, with no fail result in the final year

Monash English language level

Level C (see page 112).

- OR
- Bachelor’s degree (or equivalent) in any field with at least a GPA of 4.0 on a 7-point scale (or equivalent credit average) and
- Monash English language level

**Monash English language level**

- OR
- Bachelor’s degree (or equivalent) in any field with at least a GPA of 4.0 on a 7-point scale (or equivalent credit average)
- Monash English language level

**Monash English language level**

Level C (see page 112).

- OR
- Bachelor’s degree (or equivalent) in any field with at least a GPA of 4.0 on a 7-point scale (or equivalent credit average)

**Monash English language level**

Level C (see page 112).

1. You’ll be assessed on your entire academic record. If you have not completed any formal study in the last eight years, you’re expected to submit a current curriculum vitae (CV) and a completed Monash JD personal statement. The personal statement may include your reasons for wishing to study law, why you want to study at Monash Law School, any industrial work or relevant work experience, any applicable achievements and other relevant aspects that you feel will improve your application.

2. Applications in Australia and New Zealand Bachelor degrees only.

3. In equivalent Monash University grading scale terms, a 40% scale where 50% is a pass.

4. Credit for prior studies, up to a maximum of 48 credit points, may be awarded.

**COURSES**

**2021 INTERNATIONAL GRADUATE COURSE GUIDE**

---

I chose Monash because it has been one of the most prestigious law schools in the world. As someone who aspires to become an international lawyer, I believe the Monash JD will make me stand out when I practice either as an Australian or a Chinese lawyer. Besides learning theoretical knowledge, I got the opportunity to enhance my practical legal skills through studying the professional practice unit. When participating in this clinical legal education program, I’m able to handle real-life legal problems under the supervision of a qualified legal practitioner.

Guanyi Xu
For Monash JD 2019
LAWS (LLM) 
Expert master’s for law graduates

The Monash LLM is designed for law graduates wanting to develop in-depth knowledge of a particular legal area, to advance their professional expertise in a current area of practice.

You’ll gain advanced professional skills and knowledge of law developments, practice and scholarship in one or more areas of law.

The Monash LLM enhances your capacity to undertake independent research, and provides options for a pathway to doctoral studies.

Specialisations

Commercial and corporate law

The Master of Laws in Commercial and Corporate Law specialisation will equip you with a theoretical and practical grounding in commercial law, and gives you the opportunity to pursue emerging areas of study or explore existing knowledge at a deeper level.

Suitable for law graduates interested in developing or enhancing a specialist career as commercial lawyers or in-house counsel.

Criminal law and forensics

The Master of Laws in Criminal Law and Forensics specialisation will equip you with a theoretical and practical grounding in the interaction between science, medicine, technology and the law. This specialisation gives you the opportunity to pursue emerging areas of study or explore existing knowledge at a deeper level.

Suitable for law graduates interested in developing or enhancing a specialist career as criminal lawyers, investigators, forensic practitioners or evidence experts.

Dispute resolution

The Master of Laws in Dispute Resolution specialisation provides you with advanced professional skills and specialist knowledge in the fields of formal and informal dispute resolution.

Suitable for law graduates interested in developing or enhancing specialist careers in dispute resolution, whether as a barrister, arbitrator, mediator or other dispute resolution practitioner.

Global society and human rights

The Master of Laws in Global Society and Human Rights specialisation equips you with theoretical and practical knowledge in the laws governing human and civil rights. It aims to expand your expertise, and gives you the opportunity to pursue emerging areas of study or explore existing knowledge at a deeper level.

Suitable for law graduates practicing in the fields of international and human rights law.

Health law and community

The Master of Laws in Health and Community Law specialisation equips you with a theoretical and practical grounding in the laws regulating the health and community sectors. It gives you the opportunity to expand your expertise in this important area of the law by pursuing emerging areas of study or explore existing knowledge at a deeper level.

Suitable for law graduates practicing in the fields of health and family law.

Labour and employment law

The Master of Laws in Labour and Employment Law specialisation equips you with a thorough theoretical and practical grounding in the laws regulating employee relations. This includes labour law as well as the laws governing employee management, occupational health and safety, digital workplaces, investigations and discrimination.

Suitable for law graduates interested in specialising in workplace and employment law.

Public sector governance and regulation

The Master of Laws in Public Sector Governance and Regulation specialisation equips you with a thorough theoretical and practical grounding in laws relevant to government, and the processes and products of government regulation.

Suitable for law graduates working as barristers or solicitors focusing on the laws affecting government and public bodies.

Technology and innovation

New technologies are having a major impact on legal practice.

The Master of Laws in Technology and Innovation specialisation is designed to place you at the forefront of these developments, equipping you with the knowledge and skills to embrace change, and address the challenges of managing legal risks in a technology-driven environment.

Suitable for law graduates interested in developing or enhancing a specialist career as technology lawyers or in-house counsel.

Transnational economic regulation

The Master of Laws in Transnational Economic Regulation specialisation equips you with the theoretical and practical grounding in the laws governing the conduct of states and private parties in international economics and business transactions.

Suitable for law graduates interested in developing or enhancing a career in legal practice based on expertise in transnational economic law.

Entry requirements

Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

<table>
<thead>
<tr>
<th>Eligibility</th>
<th>Average requirements</th>
<th>Duration</th>
</tr>
</thead>
<tbody>
<tr>
<td>A bachelor degree for equivalent in law from a non-Australian jurisdiction* OR A JD or a bachelor (hons) degree (or equivalent) in law</td>
<td>Credit (60%)</td>
<td>2</td>
</tr>
<tr>
<td>A bachelor’s degree (or equivalent) in law + a graduate diploma in law or graduate certificate in law, or an equivalent postgraduate qualification OR A bachelor’s degree (or equivalent) in law + sufficient relevant work-based or other learning* to together constitute the equivalent of one of the above qualifications OR A bachelor’s degree for equivalent in law + admission to practice as an Australian lawyer</td>
<td>Credit (60%)</td>
<td>1</td>
</tr>
</tbody>
</table>

Additional requirements

You’ll need to submit:

- a CV that clearly outlines your role – including a description of tasks and responsibilities, as well as any research skills – and details the name of the organisation, including the url of the organisation
- one original employment reference that supports your CV.

Monash English language level

Level A (see page 110).

* For the purposes of satisfying these requirements, other learning may include, but is not limited to, learning in the context of other non-law degrees.
LEGAL STUDIES

Expert master’s

The Monash Master of Legal Studies is designed to equip non-lawyers with the legal skills and knowledge you need to make better managerial and commercial decisions, and to lead your organisation effectively.

This course provides you with the legal knowledge that will give you a competitive edge in your chosen career.

Specialisations

Commercial and corporate law
Become an expert in the laws that regulate business. We’ll help you develop a thorough grounding in the theory and practice in commercial and corporate law, and give you the opportunity to pursue emerging areas of study or explore existing knowledge at a deeper level.

Suitable for graduates from non-law disciplines in occupations requiring a sound grasp of commercial law issues, including accounting, company administration and business management.

Criminal law and forensics
Become an expert in the laws that regulate criminal law and forensics. This specialisation will equip you with a theoretical and practical grounding in the interaction between science, medicine, technology and the law. You’ll have the opportunity to pursue emerging areas of study or explore existing knowledge at a deeper level.

Suitable for graduates from non-law disciplines in occupations requiring a sound grasp of crime scene investigation, death investigations, forensic medicine, mental health evidence, biological and chemical evidence, and technological evidence.

Dispute resolution
Become an expert in the laws and regulations of resolving disputes. In this specialisation, you’ll develop advanced professional skills and specialist knowledge in the fields of formal and informal dispute resolution.

Suitable for graduates from non-law disciplines in occupations requiring in-depth knowledge of dispute resolution.

Global society and human rights
Become an expert in the laws regulating human rights both internationally and in Australia. The global society and human rights specialisation equips you with theoretical and practical knowledge in the laws governing human and civil rights. It aims to expand your expertise, and gives you the opportunity to pursue emerging areas of study or explore existing knowledge at a deeper level.

Suitable for graduates interested in developing or enhancing a career in the government and regulatory sector, or in a human rights-focused organisation.

Health law and community
Become an expert in the laws regulating the health and community sectors. This specialisation will provide you with a theoretical and practical grounding in the laws regulating the health and community sectors. It gives you the opportunity to expand your expertise in this important area of the law by pursuing emerging areas of study or explore existing knowledge at a deeper level.

Suitable for graduates from non-law disciplines in occupations as health professionals, health administrators, government officers, health advocates and others who want a deeper understanding of the laws that impact on the health and community sectors.

Labour and employment law
Become an expert in the laws regulating industrial and employee relations. This specialisation equips you with a thorough theoretical and practical grounding in the laws regulating employee relations. This includes labour law as well as the laws governing employee management, occupational health and safety, digital workplaces, investigations and discrimination.

Suitable for graduates interested in developing or enhancing a specialist career in employment law, human resources and management for the public sector, corporations, trade unions, and employer associations.

Public sector governance and regulation
Become an expert in the laws regulating the public sector. The public sector governance and regulation specialisation equips you with a thorough theoretical and practical grounding in laws relevant to government, and the processes and products of government regulation.

Suitable for graduates from non-law disciplines interested in developing or enhancing careers in the government and regulatory sector.

Technology and innovation
New technologies are having a major impact on legal practice. The technology and innovation specialisation is designed to place you at the forefront of these developments, equipping you with the knowledge and skills to embrace change and address the challenges of managing legal risks in a technology-driven environment.

Suitable for graduates from non-law disciplines looking for an in-depth understanding of the legal implications of technological change and digitalisation.

Transnational economic regulation
Become an expert in the laws regulating international and cross-border trade. You’ll be equipped with the theoretical and practical grounding in the laws governing the conduct of states and private parties in international economics and business transactions.

Suitable for graduates from non-law disciplines working in government or the international development sector.

Entry requirements

Monash English language level

Level A (see page 110).

Additional requirements

• a CV that clearly outlines your role— including a description of tasks and responsibilities, as well as any research skills—and details the name of the organisation, including the role of the organisation
• one original employment reference that supports your CV.

Further information

• You’ll be assessed on your entire academic record. As a general rule, those who don’t have a credit average will need to have at least two years of relevant work experience, although the required period may be shorter where the work experience has been supplemented by other relevant learning.
• In equivalent Monash University grading scales, a 65% average is equivalent to a mark of 60%, a 75% average is equivalent to a mark of 70%, and a 85% average is equivalent to a mark of 80%.
• To qualify for a bachelor honours degree for the purpose of admission, the course must generally be a minimum of four years duration and include a semester-length research component.
• A detailed list of discipline codes is available in the specific area of specialisation.
• This includes learning in the context of completion of legal professional admission requirements.
**ADDICTIVE BEHAVIOURS**

**Graduate Diploma of Addictive Behaviours**

The Master of Addictive Behaviours is offered in partnership with Turning Point, an internationally renowned clinical treatment and research centre.

You’ll learn from national and international experts from Monash, Turning Point and other leading universities, and cover issues such as problem drinking and gambling, and the misuse of prescribed and illicit drugs.

The course gives you a comprehensive overview of addiction science, policy and practice. It’s a multidisciplinary, modular graduate degree that’s delivered online but retains a strongly interactive focus.

The program is built on a strong conceptual and theoretical foundation, with topics including epidemiology, public health and policy, prevention and treatment, and research methods.

It suits graduates in psychology, criminology, nursing, medicine and social work, and professionals in the fields of criminal justice, mental health, community health and public policy.

**Entry requirements**

Depending on your prior qualifications and experience, you may be eligible for entry credit that reduces the duration. Selection is based on your previous academic achievement in your prior qualifications that must be accredited to the equivalent Australian level specified in the table below:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**Additional requirements**

Each application will be considered on its merit. You may be required to participate in an interview. The following may need to be provided before your application can be assessed:

- A curriculum vitae showing relevant industry experience
- Academic transcripts of relevant degrees
- A statement of purpose (500 words) outlining reasons for undertaking the course, and your areas of interest
- Examples of high-level written skills, including journal articles and book chapters.

**AVIATION MEDICINE**

**Graduate diploma**

The Graduate Diploma in Aviation Medicine is the only course of its kind in the Australasian region, and one of only two in the world.

This course provides you with a comprehensive and deep knowledge of aviation medicine in all its aspects, including flight physiology, clinical and respiratory aviation medicine, human factors, accident investigation and aviation safety, and medical issues affecting aviators and passengers in military, spaceflight and civil aviation operations.

Learn from a highly qualified and experienced team of aviation medicine specialists, and acquire in-depth theoretical knowledge with strong links to the global aviation industry. You’ll graduate with an advanced, internationally recognised qualification in aviation medicine.

**Entry requirements**

Selection is based on your previous academic achievement in your prior qualification(s).

BIOMEDICAL AND HEALTH SCIENCE

Expert master’s

Your initial year in the Master of Biomedical and Health Science course will focus on intensive training. This includes how to conduct research through coursework and research skills training, and engaging in specialist research in theory units. Your second year consists of a full-time research project and internship under the supervision of an academic staff member.

Specialisations

Cancer biology and therapeutics
This gives you the skills to formulate a research question on the role of cancer-causing genes and the clinical applications of therapies arising from the discipline knowledge gained. The emphasis is on understanding cancer biology, including the molecular mechanisms underpinning human cancers and targeted therapeutics used to treat patients with the disease.

Cardiovascular diseases
This gives you the skills to formulate a research question and conduct research on the role of the cardiovascular system in health and disease, with emphasis on dysfunction of the cardiovascular system in disease, or how disease impacts the cardiovascular system.

Infectious diseases and population health
You’ll gain the skills to formulate a research question and conduct research on the most important, prevalent, emerging or neglected diseases affecting humans. The emphasis is on diseases affecting resource-poor or low- and middle-income countries.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

Monash English language level

Level B (see page 112).

Neuroscience

You’ll be provided with the skills to formulate a research question and conduct research on the relationships between brain processes and behaviour in health and/or disease, with emphasis on changes in brain and behaviour when there’s injury and/or neurodegeneration.

Regenerative medicine and stem cells

This gives you the skills to formulate a research question and conduct research on the repair or replacement of damaged human tissues and organs in health and disease, with emphasis on the cells, factors, other biological building blocks, and bioengineered materials and technologies that assist the body’s regenerative capacity.

BIOTECHNOLOGY

Expert master’s

This new course integrates biotechnology and entrepreneurship, and equips you with the skills and knowledge to work in one of Victoria’s fastest-growing sectors.

The Master of Biotechnology integrates biotechnology and entrepreneurship through a range of multidisciplinary coursework, research and work-integrated units in modern areas of studies that pave the way to myriad employment prospects.

In the first year (Part A) of the course, you’ll be taught theoretical knowledge and practical skills in contemporary biotechnology-related topics, and the processes involved in obtaining research funding and translating biomedical products from lab to life.

In the second year (Part B), if you’re achieved above a 70% per cent average in your first-year studies, you’ll have the option to undertake an industry placement in a pharmaceutical, medical device, life science and/or regulatory organisation. If you satisfactorily complete the placement program, you’ll be well-positioned to work in competitive industrial environments.

Part B will also allow you to undertake a research project, where you’ll work closely with experts in a specialised area of research to advance knowledge of human diseases, and explore therapeutic targets for the prevention and treatment of these conditions.

In addition to the industry placement program and research project, Part B offers a range of coursework electives in interdisciplinary fields of pioneering developments in biotechnology research and enterprise.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

Level B (see page 112).
**CLINICAL EMBRYOLOGY**

**Expert master’s**

Monash’s reputation as a world leader in this field has been long-established. The intensive training in the Master of Clinical Embryology will give you the knowledge and practical skills to contribute to human infertility clinical services.

Your studies will include the foundations of mammalian embryology, detailed assessment of all infertility treatment strategies, and the theoretical basis behind embryo production, embryo selection and cryopreservation, with a focus on all current and future technologies associated with assisted reproductive technology (ART).

Through this internationally renowned course, you’ll acquire the practical skills required of andrologists and embryologists through continual hands-on training, and be ready to work in and manage human ART clinics. By completing a research project, you’ll enhance your research skills and have the opportunity to attend and present at local and international conferences. You can also exit the course early with a Graduate Diploma of Clinical Embryology, if you meet the requirements.

**CLINICAL MEDICINE**

**Expert master’s**

Advance your career as you join the next generation of leaders in emergency and trauma clinical care.

This course will provide you with expert clinical skills, enhanced aptitude for clinical and non-clinical leadership, and specialised academic skills in research and education delivery to complement your medical practice.

Delivered in partnership with The Alfred, the Master of Clinical Medicine offers a unique opportunity to complete a globally recognised graduate qualification delivered by a world-leading teaching faculty from a clinical service at the forefront of emergency and trauma care and innovation.

**Specialisations**

- Clinical Emergency Medicine
- Clinical Trauma Medicine

---

**Entry requirements**

Selection is based on your previous academic achievement in your prior qualification/s.

**ELIGIBILITY**

International applicants will need a Bachelor of Medical Science and Doctor of Medicine or an equivalent medical degree recognised by the Medical Board of Australia to have a current appropriate study visa (e.g. Training Visa, +

- registration with Australian Health Practitioner Regulation Agency (AHPRA) or equivalent accredited professional registration body +
- a minimum of two years’ equivalent full-time experience in the related discipline and evidence of current engagement in clinical practice in this area of specialisation.

**Additional requirements**

- You’ll also need to meet additional requirements for each specialisation. Please visit monash.edu/study/courses/find-a-course/2020/clinical-medicine-m6923
- Special requirements: You’ll also be required to obtain a Working with Children Check.

---

**Monash English language level**

Level A (see page 112).
The only course of its kind in Victoria, our Master of Clinical Research develops the analytical and communication skills necessary to work in the broad domain of clinical research and practice.

Through this program you’ll develop a detailed understanding of biostatistics, epidemiology, data management, clinical trials, clinical measurement, ethical practice, systematic reviews and meta-analysis, and critical appraisal of the scientific literature for application in research and clinical practice.

Taught by some of Australia’s leading clinical academics and with flexible content delivery, our curriculum is designed to help you balance the demands of a busy workflow with the need to engage in further professional development.

Our program also offers a research stream that can be used as a pathway to a PhD. You may also consider undertaking the Graduate Diploma of Clinical Research as a pathway to the master’s program.

For most units, the majority of contact hours are facilitated through the University’s online learning platform, with additional face-to-face contact during designated study days at Public Health and Preventive Medicine at the Alfred Medical Research and Education Precinct in Melbourne.

### Entry requirements

</tr>
</tbody>
</table>

### Additional requirements

Relevant work experience or a statement from an employer to substantiate your period of employment.

### Monash English language level

Level A (see page 112).

---

1. In equivalent Monash University grading scale terms, a 100% scale where 50% is a pass.
2. Even if you’re eligible for a shorter course duration, you may elect to complete the longer duration.
3. Related fields include public health science and medicine.
DIETETICS
Professional entry master’s

This graduate course equips you with the professional and personal qualities for future dietetic practice in a variety of workplace settings. It integrates academic teaching and learning with clinical, population health, food service, research and management experience, and is carried out in both academic and professional practice placement settings. Professional practice placements may be in an urban or rural setting. You’ll also work closely with patients at Victoria’s major hospitals, and implement public health projects with organisations such as YMCA and Parks Victoria. The course also has plenty of opportunities to apply your dietetics knowledge outside of the classroom. You’ll learn through simulated patient scenarios, hands-on food activities, and by working in Monash’s on-site nutrition clinic. Graduates will fulfil the national competency standards for entry-level dietetics, as defined by the Dietitians Association of Australia (DAA).

Entry requirements
Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

<table>
<thead>
<tr>
<th>Eligibility</th>

* This course isn’t available for fee-voucher or full-time study (through entry) unless you’ve completed the Australian University Bachelor of Nutrition Science with the required subjects, or an equivalent nutrition science degree where credit may be given for units completed that are equivalent to the first semester and one quarter of the master’s program.

Additional requirements
You’ll be required to complete a supplementary information form, which is available at https://sites.google.com/monash.edu/medicina/medicina/courses/dietetics.

Special requirements
Upon enrolment you’ll be asked to:

• comply with the mandatory immunisation requirements in readiness for clinical/fieldwork placements
• obtain a National Police Check (annual requirement)
• obtain a Working with Children check

Monash English language level
Level A (see page 112).

DEGREE AWARDED
• Master of Advanced Midwifery Practice (M6001B)
• Master of Advanced Paramedic Practice (M60018)

ALTERNATIVE EXIT
Graduate Certificate of Advanced Health Care Practice

COURSE CODE: M6002B
CRICOS: 010440G

1 There are specific requirements for each specialisation – for further details, visit monash.edu/admissions.
2 In equivalent Monash University grading scale terms, a 90% scale where 50% is a pass.
3 Even if you’re eligible for a shorter course duration, you may elect to complete the longer duration. Not all specialisations are available for study as a 1.5-year duration.
4 Discipline study relevant to the specific area of specialisation.
5 A credit average (60%) is required in both qualifications.

1 Your undergraduate degree must include four units in chemistry/biochemistry. Four units in human biology and human physiology, one unit in human nutrition and one unit in research methods. Your undergraduate degree must have been completed in the past 10 years unless you have been assessed as having work experience that the Faculty considers equivalent.
2 In equivalent Monash University grading scale terms, a 90% scale where 50% is a pass. There are limited places available in this course. The entry score is only indicative.
3 Even if you’re eligible for a shorter course duration, you may elect to complete the longer duration.
4 Science-based fields include biomedical sciences, science, health sciences, nutrition, food service and exercise sciences.
5 For example, food sciences, nutrition science, exercise science.
6 In addition, your undergraduate nutrition science degree will need to be assessed as providing equivalent content and assessment at the master’s level. This applies to all units which include nutrition and clinical sciences. Current public health nutrition practice, health education and promotion, nutrition across the lifespan, food regulation in Australia, cultural competency and professional development as a dietician.
**HEALTH AND SCIENCE RESEARCH**

**Graduate diploma**

Develop your passion for research. Build on your undergraduate degree and advance your knowledge in a health or science discipline through a combination of coursework and research. You'll also undertake research methodology training and carry out an independent research project in your selected discipline, working closely with a supervisor who'll provide you with guidance and academic counselling. The course offers a pathway to higher-degree research.

**Entry requirements**

Selection is based on your previous academic achievement in your prior qualification/s that must be accredited to the equivalent Australian level specified in the table below.

MEDICAL SCIENCE AND DOCTOR OF MEDICINE
Bachelor’s and master’s

Our graduate-entry medical program is designed as an integrated, interdisciplinary curriculum. It’ll prepare you to graduate with the knowledge, skills and attributes of a beginning medical practitioner. The overall vision is to deliver a course that supports the high international reputation and strengths established by the Faculty of Medicine, Nursing and Health Sciences at Monash University.

You’ll see the discoveries of our renowned researchers put into clinical practice, and benefit from our links with the largest healthcare provider network in Australia, which includes the Monash Medical Centre, The Alfred (Melbourne’s major casualty hospital), Eastern Health, and Victorian health services in rural, regional and outer metropolitan Melbourne.

The course is designed as an integrated curriculum, with units taught in an interdisciplinary fashion by staff from across the faculty and in a wide range of learning environments both on campus and at clinical sites.

Entry requirements
Selection is based on your previous academic achievement in your prior qualification/s that must be accredited to the equivalent Australian level specified in the table below.

<table>
<thead>
<tr>
<th>Eligibility</th>
<th>Average requirements</th>
<th>Duration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Successful completion of a bachelor’s degree with significant and broad biomedical science content from an internationally recognised university</td>
<td>Applicants must achieve a minimum GPA of 6.0 out of 7.0</td>
<td>4</td>
</tr>
</tbody>
</table>

Special requirements
Upon enrolment you’ll be asked to:
- comply with the mandatory immunisation requirements in readiness for clinical/fieldwork placements
- obtain a National Police Check (annual requirement)
- obtain a Working with Children Check
- obtain a current Level 2 First Aid certificate (by end of the first semester) – highly recommended.

Clinical skills is active, hands-on learning led by clinicians. It’s about developing fundamental skills for taking a patient history, and covers basic examination techniques and simple procedural skills.

In clinical years, we provide opportunities for you to develop and enhance these skills during clinical placement, by engaging with real patients during bedside tutorials and clinical settings, under the guidance of medical practitioners. Clinical placements may be in metropolitan or rural areas, where travel may be required.

Internship
Any offer of a place in a Monash University medical course is made on the understanding that Monash in no way guarantees any period of internship in an Australian hospital at the completion of their medical degree. Internship places are not allocated by Monash University.

ADVANCED NURSING

Expert master’s

The Master of Advanced Nursing prepares you for leadership roles in management and education.

The course enables you to develop advanced-practice knowledge and leadership in specialist practice, including skills to plan, implement, coordinate and evaluate healthcare, as well as the ability to formulate policy for a diverse and multicultural society.

The program has flexible teaching delivery options, and offers a range of individual career pathways including nursing, education or management positions within industry, government or independent professional practice. Most specialisations can be taken by coursework, or a combination of coursework and research.

As a graduate, you can work in a wide range of general and specialist clinical, educational and healthcare environments in senior positions, and contribute to the health of individuals, families and communities.

Specialisations

Disaster nursing (Peninsula)

This specialisation will prepare you with leadership skills to respond and coordinate nursing activities during disasters. The focus of these units enables you to study interventions associated with global and local disaster situations.

General studies in advanced nursing (Clayton and Peninsula)

This enables you to tailor your unit choices to suit your interests or needs while maintaining a strong focus on leadership. You’ll liaise with your course coordinator to choose the units that will best suit your needs.

Nursing education (Peninsula)

You’ll be provided with leadership skills in a variety of nursing education contexts, including curriculum development.

Nursing leadership and management (Clayton)

You’ll gain leadership and management skills in a variety of nursing service contexts and individual career pathways, including nursing, education or management positions within industry, government or independent professional practice.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

<table>
<thead>
<tr>
<th>Eligibility</th>
<th>Average requirements</th>
<th>Duration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bachelor’s degree in nursing (or equivalent)</td>

<td>2</td>
</tr>
<tr>
<td>Bachelor’s degree in nursing (or equivalent) – a minimum of two years full-time equivalent relevant professional experience in nursing</td>
<td>Credit (60%)</td>
<td>1.5</td>
</tr>
<tr>
<td>Bachelor’s (honours) degree (or equivalent) in a related field</td>
<td>Credit (60%)</td>
<td>1</td>
</tr>
</tbody>
</table>

Additional requirements

You’ll also need to submit:
- application letter addressing specialisation
- certified evidence of current nursing registration.

Special requirements

Upon enrolment you’ll be asked to:
- comply with the mandatory immunisation requirements in readiness for clinical/fieldwork placements
- obtain a National Police Check (annual requirement)
- obtain a Working with Children Check.

Monash English language level

Level B (see page 112).

NURSING PRACTICE

Professional entry master’s

The Master of Nursing Practice provides a professional nursing qualification for those who have an Australian bachelor’s degree (or equivalent) from a recognised university.

This intensive program immerses you in clinical experience from the start of your degree. Clinical placements will be conducted in metropolitan and regional Victoria, where you’ll put classroom concepts into practice on the wards.

Our Master of Nursing Practice provides you with the knowledge and clinical skills to provide high-quality nursing care.

Once graduated, you’re skilled in problem-solving and clinical reasoning, competent and safe in your practice of clinical nursing skills, and able to work within legal and ethical standards of practice.

Entry requirements

Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

<table>
<thead>
<tr>
<th>Eligibility</th>
<th>Average requirements</th>
<th>Duration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bachelor’s degree (or equivalent) – including a Bachelor of Nursing AND have completed either a minimum of one six-credit point unit in human biology/physiology or a related area from any recognised tertiary institution, or the Monash University Human Biology short course (which has been assessed as equivalent to this requirement)</td>
<td>Credit (60%)</td>
<td>2</td>
</tr>
</tbody>
</table>

Special requirements

Upon enrolment you’ll be asked to:
- comply with the mandatory immunisation requirements in readiness for clinical/fieldwork placements
- obtain a National Police Check (annual requirement)
- obtain a Working with Children Check.

Monash English language level

Level D (see page 112).
OCCUPATIONAL AND ENVIRONMENTAL HEALTH

Expert master’s, graduate diploma

Develop the skills and knowledge in quality-level occupational health and safety services in order to identify, prevent and manage occupational and environmental health risks and related health problems.

You’ll learn to systematically control hazards and exposures within a broad range of workplace and community environments.

EXPERT MASTER’S

You’ll be equipped to take responsibility for high-level independent judgements, and initiate, implement and evaluate risk management interventions within varied occupational and environmental contexts. It’s particularly suited to medical practitioners, nurses, allied health personnel, scientists, and occupational health and safety managers. For most units, the majority of contact hours are facilitated through the University’s online learning platform, with additional face-to-face contact during designated study days at Public Health and Preventive Medicine at the Alfred Medical Research and Education Precinct in Melbourne.

Entry requirements

Selection is based on your previous academic achievement in your prior qualification/s that must be accredited to the equivalent Australian level specified in the table below.

GRADUATE DIPLOMA

This course gives health professionals the attitude, skills and knowledge necessary to responsibly provide preventive health services and to both reduce the health impacts of disease and injury, and assist to systematically address hazards arising from workplaces and within communities.

Entry requirements

Selection is based on your previous academic achievement in your prior qualification/s that must be accredited to the equivalent Australian level specified in the table below.

Additional requirements

You’ll need to submit:

- a curriculum vitae showing relevant work experience
- a statement of purpose (250 words) outlining your reasons for undertaking the course.

Monash English language level

Level A (see page 112).

OCCUPATIONAL THERAPY PRACTICE

Professional entry master’s

Become an occupational therapist in just two years with our accelerated learning program.

The course requires full-time enrolment over two years and operates over 72 weeks. It includes 1000 hours of fieldwork education to meet the World Federation of Occupational Therapists’ minimum standards for the education of occupational therapists. You’ll also have opportunities to work with clients on campus in our supported accommodation units.

Our Master of Occupational Therapy Practice is an integrated curriculum focused on scenario-based learning.

Working collaboratively with one of our partners, you’ll also complete an extensive practice-based project in the community, and build professional skills in communication and project management.

Entry requirements

Selection is based on your previous academic achievement in your prior qualification/s that must be accredited to the equivalent Australian level specified in the table below.

ELIGIBILITY

Bachelor’s degree + a statement of purpose (250 words) outlining reasons for undertaking the course.

Monash English language level

Level C (see page 112).

PHYSIOTHERAPY

Professional (extended)

This three-year, integrated program will provide you with the knowledge, skills and clinical practice experience required to work as a physiotherapist, with a particular focus on the development of leadership skills.

Building on an undergraduate degree in foundational sciences, and learning from expert physiotherapists and researchers, the Doctor of Physiotherapy will prepare you to work in public and private hospitals, private practice, sports, aged care and community health, both locally and beyond.

Entry requirements

Selection is based on your previous academic achievement in your prior qualification/s that must be accredited to the equivalent Australian level specified in the table below.

ELIGIBILITY

Bachelor’s degree or equivalent + a statement of purpose (250 words) outlining reasons for undertaking the course.

Monash English language level

Level C (see page 112).
PUBLIC HEALTH

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification/s that must be accredited to the equivalent Australian level specified in the table below.

---

1. *In equivalent Monash University grading scale terms, a 100% scale where 50% is a pass.
2. *Bachelor of Science should include a major field of study in anatomy, biology, biochemistry, genetics, pharmacology, physiology, microbiology, immunology orzoology.

---

*This course is only available to international students in ‘on ‑campus’ mode. Please note that full‑time course load for a year represents a standard full‑time course load for a year.

---

VASSANNA SONGKHUNAWEJ
Graduate Diploma in Reproductive Sciences

“Every day I'm using the knowledge I gained from my graduate studies at Monash to help patients fulfill their dreams of having a family, whether it's helping patients understand the process they're embarking on, or improving procedures in the clinic to maximise success.”

---

1. A 15% scale where 50% is a pass.
2. Data is in equivalent Monash University grading scale terms, a 100% scale where 50% is a pass.
**SOCIAL WORK**

**Professional entry master’s**

This course prepares you for a career as a professionally qualified social worker. It includes studies in theory, skills development and supervised professional practice, and opportunities for group-based learning, community engagement, practice research and integration of social work theory and practice. The theoretical content builds on the knowledge graduates have acquired in previous higher education, while the social work skills components and professional practice introduce you to contemporary social work practice. The course is accredited by the Australian Association of Social Workers (AASW), and includes 1000 hours of supervised professional practice.

**Entry requirements**

Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

<table>

Level B (see page 112).

¹ In equivalent Monash University grading scale terms, a 100% scale where 50% is a pass.

² Even if you’re eligible for a shorter course duration, you may elect to complete the longer duration.

³ Completion of units of mathematics with an emphasis on multivariable calculus, linear algebra, probability, statistics and differential equations.

⁴ Or qualification/experience that the faculty considers to be equivalent or a satisfactory substitute.

**FINANCIAL MATHEMATICS**

**Expert master’s**

Do you have an aptitude and passion for mathematics and statistics, a keen interest in finance and insurance, and want to work for a major institution in finance, insurance or the money market?

Our Master of Financial Mathematics gives you a deep understanding of the finance world, and the ability to speak its language. Combining theory with hands-on practical skills via an industry placement or research project, the program ensures you’ll graduate with the skills increasingly sought after by banks and other financial institutions.

It offers advanced training in the core areas of stochastic, financial and insurance modeling, statistical analysis and computational methodology, as well as a range of elective topics from economics, econometrics, finance, mathematics and probability. As a graduate, you’ll be able to pursue specialist careers in research departments within banks, insurance and consultancy firms, or work on derivatives valuation and portfolio management within investment houses.

**Entry requirements**

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

FOOD SCIENCE AND AGRIBUSINESS

Expert master’s

The Master of Food Science and Agribusiness is a forward-thinking, interdisciplinary degree. It involves the faculties of Science, Engineering, Medicine, Nursing and Health Sciences, and Monash Business School, as well as the Monash Food Innovation Centre. The degree recognises the urgent need to address the future of human food supply in the face of global population and environmental pressures, and the dependence of human welfare and geopolitical stability on food supply adequacy and accessibility. Central to the course is an appreciation of the scale and dependencies of production, processing, distribution and marketing systems, with an emphasis on innovation driven by consumer need.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to an equal Australian level specified in the table below.

SCIENCE

Expert master’s

This advanced program is suited to science graduates with an undergraduate degree in a related discipline.

Our Master of Science is designed for two distinct groups of students: the professional scientists aiming to extend their industry-related knowledge and skills for career advancement, and those considering a research degree. In the first year of the course, you’ll complete advanced studies in a chosen field as well as a project in your chosen topic. In the second year of the course, you’ll complete further studies to deepen your knowledge in your chosen field. These studies will culminate in a capstone unit involving a research project that could be theoretical in nature or applied to an industry context.

The Master of Science is available in the following disciplines:

- Astrophysics
  - Choose from computational astrophysics, observational astronomy, general relativity, exoplanets, stars, nuclear astrophysics, cosmology, and high-energy astrophysics.

- Atmospheric science
  - Choose from statistics for climate dynamics, dynamical meteorology, the general circulation, atmospheric modeling, atmospheric boundary layers, and ocean circulation and dynamics.

- Earth science
  - Choose from ore deposits, mineralogy, petrology, geochemistry, geomorphology, advanced structural geology, tectonics and geodynamics, geology from geophysics, field geology, geographic information systems (GIS), remote sensing, spatial data analysis, hydrogeology and environmental geochemistry, physical geography, climate change, water security and environmental pollution.

- Physics
  - Choose from quantum mechanics, condensed matter physics, statistical mechanics, quantum field theory, general relativity, atomic physics and quantum optics, classical electrodynamics and field theory and quantum information theory, quantum computation, quantum fluids and many body theory, diffraction physics and imaging, x-ray optics, and synchrotron science.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

MATHMATICS

Expert master’s

The importance of mathematics ranges from fundamental developments enabling new technologies, to theories backing up scientific research, to the analysis of our physical and societal environments. This course provides advanced knowledge and skills in mathematics, and the capacity to use them to tackle complex problems in a variety of situations.

The flexible coursework offering ensures you can create a program to suit your interests, from pure mathematics that develops the core theory, to statistics and applied and computational mathematics that extend this theory to bring practical solutions to real-world problems. All these fields contribute to a far-reaching and comprehensive master’s program that equips you with advanced knowledge and skills to make you employable in industry, or prepare you for doctoral studies.

Entry requirements

Depending on your prior qualifications and experience, you may be eligible for entry credit, which reduces the duration. Selection is based on your previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

Monash English language level

Level A (see page 112).

1. In equivalent Monash University grading scale terms, a 100% scale where 50% is a pass.
2. Even if you’re eligible for a shorter course duration, you cannot enrol in the course for less than the duration.
3. Knowledge of topics in composition and nomenclature of matter; physical, chemical, electrochemical properties of matter; drives of molecular interactions and stability; quantifying chemical reactions and principles of chemical analysis.
4. Or qualification/experience or a satisfactory substitute that the faculty considers to be equivalent.
5. High Credit (65%) average over four units in mathematics of which at least one is at level 2.
6. High Credit (60%) average in the completion of eight units in mathematics.
7. In equivalent Monash University grading scale terms, a 100% scale where 50% is a pass.
8. Even if you’re eligible for a shorter course duration, you cannot enrol in the course for less than the duration.
9. Or qualification/experience or a satisfactory substitute that the faculty considers to be equivalent.
10. A high credit (65%) average is required in the science discipline you intend for your master’s.
MULTIDISCIPLINARY COURSES

ENVIRONMENT AND SUSTAINABILITY

Expert master’s

Our future hangs in the balance. Humanity is developing at a rate that’s giving rise to widespread environmental, economic and social challenges for sustaining life on Earth. It’s vital for us to change how we work and live. If you’re future-conscious and want to transform society through sustainable solutions, this is your chance to learn the skills you’ll need. Our Master of Environment and Sustainability will give you the training, language and tools to be a leader in a rapidly growing field. You’ll explore the trends, issues and science underlying global sustainability problems, and learn how to evaluate, analyse and collaborate across sectors to influence, motivate and effect positive, sustainable change.

Get hands-on, real-world experience through an internship, or an interdisciplinary industry or research project or thesis to help drive innovation, and be taught by experts from multiple disciplines and sectors who are leading the environment and sustainability agenda in Australia and internationally. Combine your industry experience or previous studies with a strong foundation in understanding sustainability challenges, nationally and globally, and use it to develop solutions in your sector. You’ll have the skills to provide strategic leadership in policy formulation, governance and regulatory advice, management and capacity-building in sectors as diverse as business, government and not-for-profits.

Entry requirements

Depending on your prior qualifications and experience, you’ll be eligible for entry credit, which reduces the duration. Selection is based on previous academic achievement in your prior qualification/s that must be accredited to the equivalent Australian bachelor’s degree (or equivalent) in any field and a graduate certificate/diploma (or equivalent) in any field.

Specialisations

Corporate environmental and sustainability management

This specialisation explores the complex mix of social, ecological and economic sustainability challenges faced by organisations. It equips you with the skills to implement strategies and initiatives to address these challenges.

Environment and governance

You’ll gain the skills to understand governance to enable societal and governmental change, and responsible action to support sustainability. Enriched with the knowledge of world leaders from environmental and social sciences, and through case studies, you’ll explore the dynamic processes of environmental governance and implementation.

Environmental security

You’ll gain an understanding of the scientific knowledge needed to guide the sustainable use, management and protection of the natural environment. You’ll also develop the literacy needed to grow, interpret and translate scientific evidence about environmental security for a range of stakeholders.

International development and environment

Examine how environmental change, economic transformations and institutional practices interact to reshape social and ecological vulnerability, resilience and sustainability. You’ll develop the skills to analyse the causes of poverty, disadvantage and environmental change, and to plan and implement international development projects and programs.

Leadership for sustainable development

You’ll gain the theoretical insights, analytical skills and practical capacities to guide, influence and lead processes that result in positive social, environmental and economic outcomes. You’ll develop the literacy and core skills to analyse complex situations, identify effective intervention points, create novel solutions and collaboratively design processes of influence to enable change.

The diversity of this master’s program is simply amazing. Students come from all over the world, each with unique backgrounds, cultures, ages and experiences. This is a reflection of the sustainability challenges that the world faces today — there’s no one policy, engineered technology or social restructuring that can solve a problem. Instead, a diversity of ideas, people and resources from across the board is necessary. Moreover, critical and intelligent discussions are the norm throughout this master’s program. These exchanges of ideas are further enriched by human stories that each student has to share.”

KA-JHUN LAM

Master of Environment and Sustainability

Winner of the 2018 Council of International Students Australia 5CA International Postgraduate of the Year Award

1. In equivalent Monash University grading scale terms, a 100% scale where 50% is a pass.
2. Even if you’re eligible for a shorter course duration, you may elect to complete the longer duration.
3. Related fields include business, environmental science, humanities, science or social sciences.
4. Or qualifications/equivalents or a satisfactory substitute that the faculty considers to be equivalent.

February and July

A$44,500 (2020 fees p.a.)

Focus area: 48 credit points, which represents a standard full-time course load for a year.
PROJECT MANAGEMENT

Expert master’s

The Master of Project Management is a forward-thinking, interdisciplinary course that integrates the knowledge needed to manage projects and programs across multiple sectors.

Learn how to critically analyze complex problems, identify adaptive approaches, and use innovative practices to deliver outcomes and manage complex projects. You’ll have the opportunity to work on real projects and gain hands-on project leadership experience in a variety of areas. Focus on one discipline or choose from a range of discipline-specific electives covering IT, business, engineering, law, and sustainability.

As a graduate, you’ll be strongly placed to provide strategic project leadership in a wide range of settings, such as business delivery, IT development and engineering solutions in corporate, government and not-for-profit sectors.

Entry requirements

Depending on your prior qualifications and experience, you’ll be eligible for entry into this course, which reduces the duration. Selection is based on previous academic achievement in your prior qualification(s) that must be accredited to the equivalent Australian level specified in the table below.

ENTRY REQUIREMENTS

When you apply to Monash University for a graduate degree by coursework, you must satisfy all of the following requirements:

1. Minimum age requirements

You must be at least 17 years of age to enrol in a Monash University course. Some exemptions may apply. For further information, visit monash.edu/admissions/age-requirements

2. Academic and additional entry requirements

All Monash graduate courses require you to have successfully completed a minimum of an Australian bachelor degree (or equivalent) and satisfy the academic entry requirements. Some graduate courses may also have additional and/or special requirements. Refer to the course specific pages to locate these requirements.

3. English entry requirements

All Monash University graduate courses require you to satisfy English entry requirements. Different English entry requirements apply to graduate courses, as outlined in this guide.

English entry requirements can be met in one of the following ways:

Language of instruction

You can meet the English entry requirements if you’ve completed studies at an institution where English is the language of instruction, communication and assessment for all aspects of study for the whole of the educational institution, by satisfactorily completing one year of full-time study equivalent to 48 Monash credit points in one of the following qualifications:

- an Australian VET diploma level (or equivalent) that must be taken within two years prior to the Monash course commencement date; or
- an Australian bachelor’s degree (or equivalent) that must be completed and taken within five years prior to the Monash course commencement date.

You may be required to submit documentary evidence in the form of an official letter from the institution at which the study was completed. This document must be written and signed by the institution’s registrar (or other authorised person) of the education institution to the satisfaction of the Monash University Academic Board.

English proficiency tests

If you have not met English entry requirements as outlined above, Monash accepts the following English proficiency tests as satisfying English entry requirements, provided it has been taken within two years of the Monash course commencing date:

- Academic IELTS (International English Language Testing System): www.ielts.org
- Internet/Paper-Based TOEFL (American Test of English as a Foreign Language): www.ets.org
- Pearson Test of English (Academic): www.pearsonpte.com
- Cambridge Certificate in Advanced English (C1AE) and Cambridge Certificate of Proficiency in English (CPE): www.cambridgeenglish.org

Monash University reserves the right to ask students to undertake an English proficiency test to meet English entry course requirements. For more information regarding English entry requirements, refer to the Admission to Coursework Courses and Units of Study Procedures available at monash.edu/admissions/coursework-procedures

Please note that all entry requirements for Monash University are subject to change.

FEES

We’re committed to providing you with an ever-evolving, modern, student experience where you can take charge of your studies while being guided by highly qualified educators who are informed by, and engaged with, industry and the community.

We’re investing in innovative learning environments to deliver collaboration, contemporary and flexible learning opportunities. We embrace the opportunities offered by technology and innovation, and embed them in our teaching, in order to prepare you for any career you pursue, including those that aren’t yet created.

Our blended learning environment – physical, digital and virtual – prepares you for the workplace, and makes your time at Monash both satisfying and transformative. This underlines our philosophy that the Monash experience extends far beyond university.

In setting our fees, we take into account various factors, including the Consumer Price Index, teaching costs, market trends, demand for expertise, and competitor pricing. We acknowledge that gaining an internationally recognised qualification comes at a cost, but we ensure that the price of our degree programs mirrors the true cost of delivering a premium educational experience where you’ll learn from some of the finest minds in the world.

Tuition fees

To study at Monash University, you’ll need to pay tuition fees to the University. As an international student, you’ll be charged full fees. Tuition fees vary depending on the course and the year of commencement. All tuition fees and course durations specified in this guide are in Australian dollars and only apply to courses studied at Australian campuses. The tuition fees quoted are for 48 credit points and are applicable to courses commencing in 2020. Tuition fees for courses commencing in 2021 will be different.

Monash University reserves the right to adjust the annual tuition fees in future years of your course. However, any adjustment factor will not exceed six per cent per year. Any adjustment will be applied on the first day of January each year for teaching periods with a census date thereafter.

monash.edu/study/fees-scholarships/fees

Overseas Student Health Cover (OSHC)

It’s a condition of the Student Visa (subclass 500) that you must hold Overseas Student Health Cover (OSHC) for the duration of your stay in Australia. Monash University requires all commencing international students to purchase OSHC for the duration of their visa. If you’re accompanied by immediate family to Australia as dependents on your student visa, you’ll also need to purchase the visa-length OSHC for them.

Your Confirmation of Enrolment (CoE), for student visa purposes, will only be issued:

- once you’ve accepted your course offer along with payment for OSHC; or
- provided proof of having a valid visa-length OSHC; or
- you’ve submitted approved documentation for exemption from payment of OSHC.

Monash English Bridging (MEB) entry requirements – for Monash University courses

If your English proficiency test does not meet the Monash University course’s English requirements for direct entry, Monash University English Language Centre offers MEB. Upon successful completion of MEB, students will have met the Monash University English language level requirements. The course is only available to students who've met the English language requirements for their graduate course but have narrowly missed the English language requirements. Duration of the course is dependent on your current level of English proficiency.

HELPING YOU GET INTO MONASH

To succeed at Monash, you’ll need excellent English language skills.

At Monash College, we’re dedicated to preparing students for success at Monash University. By completing an English course at Monash, you’ll gain fluency in English, and confidence in the academic skills required at Monash at a graduate level.

We offer three tailored English language programs designed to meet the specific requirements of the Monash course you’re aiming to enter. When you apply, we’ll assess your current skills and place you in the best program for your level and destination course.

English language courses

- Monash English (ME) – a course with flexible duration designed to build on your current English proficiency and prepare you for entry into Monash English Bridging or your preferred graduate degree.
- Monash English Bridging* (MEB) – a course designed to prepare you for the English and academic expectations of graduate study at Monash. The course is only available to students who’ve met the academic requirements for their graduate course but have narrowly missed the English language requirements. Duration of the course is dependent on your current level of English proficiency. When you receive your offer, you’ll receive a packaged offer for 10, 15 or 20 weeks, aligned to the intake of the University semester.

Introductory Academic Program (IAP) – a five-week course focused on further enhancing the study skills required for success at Monash. To be eligible, you must receive a full offer to study at Monash University.

For entry requirements, detailed course information and intake dates, visit monashcollege.edu.au/courses

The benefits of English preparation at Monash

1. Be confident in the Monash teaching and learning style before you commence your degree.
2. Benefit from our student-centric teaching style, giving you access to your tutors for immediate and personalised feedback.
3. Be better-prepared for your Monash studies by learning academic skills essential to all degrees such as:
   - how to write essays and academic reports
   - how to reference your sources
   - how to deliver presentations.
4. Study alongside like-minded students who have the same goal as you – to study at one of the world’s top universities.
5. Live in Melbourne while you study, and immerse yourself in the culture and lifestyle. You’ll improve your academic English by practising during everyday life.

Choose your English pathway

- Enter with a full offer to Monash University
- Enter with an IELTS (or equivalent) score for direct entry
- Enter with a Monash English Bridging or Monash English (ME) score

Graduate degrees at Monash University

* Not accepted for entry into all graduate degrees.
APPLICATION PROCESS FOR INTERNATIONAL STUDENTS

BEFORE YOU APPLY

Use monash.edu/study to check:
• the international entry requirements
• additional entry requirements—for example, details of relevant work experience
• special course requirements
• fees
• closing dates
• when courses start.

When should you apply?
As early as possible. Some courses may close a few months or a year before the start of the course, while others have quotas. Aim to have your online application submitted as early as possible. This allows time for your application to be processed and can help to ensure that you secure a place if your preferred course has limited places. Applying early also gives you time to get your student visa, which can take up to six months for some nationalities and countries.

Defer your studies
If you decide to delay your course commencement date, you have the option to apply to defer your studies. You’ll need to complete the following form and return it to Central Admissions for approval: monash.edu/study/how-to-apply/international-student-applications/after-you-apply/defer-or-change-your-course

HOW TO APPLY

Step 1
Apply
All students must apply for a Monash University course online. Please refer to the following website for a step-by-step guide: monash.edu/admissions/apply/online

With your online application, please provide your academic documentation, including academic transcripts, graduation certificate and grading scales (indicating the pass mark and graduation requirements if applicable). Alternatively if you are yet to complete your qualification or haven’t received your final academic documents, please provide your current transcript and indicate the qualification you are studying in your Monash application, and we may be able to make you a conditional offer.

If you’re applying for a course that has additional requirements, please also provide the necessary documentation with your online application.

You’ll be required to provide original or certified academic documentation (or other supporting documents) upon request. For further information on certifying documents, visit monash.edu/study/how-to-apply/international-student-applications/certifying-documents

Need help with your application?
Contact us:
• monash.edu/study/how-to-apply/enquiries/general-international-enquiry
• +61 39903 4788
• Chat with Monash

If you’re applying through a Monash agent, please contact them for assistance. Some agents may charge a fee for additional services, so please ask what these costs are before you make an appointment.

Please ensure that your agent is an authorised agent by visiting monash.edu/study/how-to-apply/international-student-applications/agents-database

Step 2
Your application is assessed

When your application is received, Monash University will assess your application according to University entry requirements.

Monash University is obliged to check that you’re genuinely seeking temporary entry to Australia to study. If the University forms the opinion that you’re not a Genuine Temporary Entrant (GTE), it may refuse to assess your application, withdraw an offer of a place, or cancel your confirmation of enrolment.

If your application is successful, you’ll receive a full offer in the form of an International Student Course Agreement (ISCA). Instructions will be supplied on how to accept your offer, including the fees and Overseas Student Health Cover (OSHC) you need to pay.

If we’re not able to make you a full offer immediately, you may receive a conditional offer. A conditional offer means you must submit more information and meet the requirements specified in the ISCA. Usually, the information we need is documentation (for example, official final transcript, graduation certificate or an English proficiency test) to see if you meet the specific entry requirements for the course you’ve applied for. We’ll explain what’s needed in the ISCA. Please submit the documentation to us as soon as possible, or contact us if you need any help. If you’re not successful for your first preference, your application will be considered for your next preference.

Step 3
Accepting your offer

To accept your offer, follow the instructions in your ISCA. You must complete, sign and return Part B of your ISCA, along with payment and a photocopy of the personal details page of your passport, before the offer lapse date. Your payment should include OSHC for the duration of your visa for yourself and any family members accompanying you to Australia.

When making payment it should be noted that:
• Monash University doesn’t accept cash
• dishonoured bank drafts may incur additional bank fees
• you may need to notify your bank of large deductions.

Bank drafts will need to be mailed to Central Admissions. Please ensure you include your full name and Monash student ID on the back of the bank draft.

Step 4
We send you a Confirmation of Enrolment (CoE) and enrolment package

A CoE will be emailed to you once you accept your full ISCA or packaged ISCA (with no academic conditions specified). You’ll need the CoE to apply for a student visa.

After you’ve received your CoE, we’ll email you:
• your welcome letter, and
• Destination Monash—your complete guide to living in Australia and studying at Monash University, and
• a series of emails with useful information and resources to help with your transition to Monash.

Step 5
Arrange your student visa

The Department of Home Affairs (DHA) is responsible for issuing visas for entry to Australia. Students who are planning to study a Commonwealth Register of Institutions and Courses for Overseas Students (CRICOS) registered course are required to obtain a student visa.

Applicants are advised not to commence the visa application process until they’ve been issued with their CoE. You must keep in mind that your student visa application may take up to six months or more, depending on your nationality and country of residence. All students, regardless of the financial capacity and English language proficiency documentation that may be required, will have to meet all other core visa criteria, such as the Genuine Temporary Entrant (GTE) requirement, health and character criteria.

Additional visa information and application forms can be obtained from the Monash University website at monash.edu/study/how-to-apply/international-student-applications/visa-requirements

Step 6
Enrol in units online and order your Monash ID card

Once you’ve accepted your full offer, you’ll receive an invitation to set up your electronic Monash account and enrol online in units of study.

Working through this process will help you understand and plan your course early so that you can get the best possible start. Information about the enrolment process and course-specific enrolment and arrival dates are available at monash.edu/get-started

Step 7
Register your arrival and attend orientation

Make your own travel arrangements, aiming to arrive in Melbourne at least two weeks before orientation. Orientation activities at Monash University happen before the semester starts and are designed to help you settle in. Some orientation activities focus on providing more information about your studies, while other activities are designed to help you meet new people and become familiar with our amazing campuses. Use the orientation e-bulletin to create a personalised orientation plan.
